We guarantee that our MCD-Level-1 exam simulation materials are valid and latest, choosing our products is choosing success, Why delay your preparation?

NEW QUESTION: 1 Scenario:Please read this scenario prior to answering the questionYou are serving as the Lead Enterprise Architect at a major supplier in the automotive industry. The company is headquartered in Cleveland, Ohio with manufacturing plants across the United States, Brazil, Germany, Japan and South Korea. Each of these plants has been operating its own planning and production scheduling systems, as well as custom developed applications that drive the automated production equipment at each plant.The company is implementing lean manufacturing principles to minimize waste and improve the efficiency of all of its production operations. During a recent exercise held for internal quality improvement, it was determined that a significant reduction in process waste could be achieved by replacing the current planning and scheduling systems with a common Enterprise Resource Planning (ERP) system located in the Cleveland data center. This central system would provide support to each of the plants replacing the functionality in the existing systems. It would also eliminate the need for full data centers at each of the plant facilities. A reduced number of IT staff could support the remaining applications. In some cases, a third-party contractor could provide those staff.The Enterprise Architecture department has been operating for several years and has mature, well-developed architecture governance and development processes that are strongly based on TOGAF 9.At a recent meeting, the Architecture Board approved a Request for Architecture Work sponsored by the Chief Engineer of Global Manufacturing Operations. The request covered the initial architectural investigations and the development of a comprehensive architecture to plan the transformation.The Common ERP Deployment architecture project team has now been formed, and the project team has been asked to develop an Architecture Vision that will achieve the desired outcomes and benefits. Some of the plant managers have expressed concern about the security and reliability of diving their planning and production scheduling from a remote centralized system. The Chief Engineer wants to know how these concerns can be addressed.Refer to the Scenario [Note: You should assume that the company has adopted the example set of principles that are listed and defined in TOGAF 9, Section 23.6.]One of the earliest initiatives in the Enterprise Architecture program was the definition of a set of architecture principles. These now need to be updated to address the concerns raised.You have been asked to select a set of principles most appropriate for guiding the team to define a robust solution.Based on TOGAF 9, which of the following is the best answer?**A.** Common-use Applications, Control Technical Diversity, Ease of Use, Interoperability, Data is Shared, Data is Accessible, Data Security**B.** Technology Independence, Data Trustee, Information Management is Everybody's Business, IT Responsibility, Responsive Change Management**C.** Service-orientation, Responsive Change Management, Business Continuity, Data is Accessible, Data Security**D.** Business Continuity, Common-use Applications,

Maximize Benefit to the Enterprise, Data is Shared, Data is Accessible, Data Security**Answer: D**

NEW QUESTION: 2 Refer to the exhibit. Which description of the effect of entering the switch port trunk allowed vlan 2,3,4command on FastEthernet0/2 is true?**A.** The two workstations continue to communicate without a default gateway configured.**B.** The command is unsupported on a trunk where VLANs have already been pruned manually.**C.** The running configuration displays switch port trunk allowed vlan 1-5 for Fa0/2.**D.** The two workstations stop communicating because they are on VLAN 5, which is not allowed on thetrunk.**Answer: D**

NEW QUESTION: 3 Based on which of the following; reservations or purchase requisitions can automatically be created for a project?There are 2 correct answers to this question.Response:**A.** Internal service planning**B.** External service planning**C.** Material**D.** WBS element**Answer: B,C**

NEW QUESTION: 4 In order to collaborate on aproject using change version control, which option must be selected after right-clicking on a project in the IBM Tivoli Directory Integrator V7.1 Configuration Editor (C, E)?**A.** Properties**B.** Team > Share Project**C.** Export > Team Project Set**D.** Configure**Answer: B**
