NEW QUESTION: 1 CORRECT TEXT The _____ command is used to send ICMP ECHO_REQUEST datagrams to a single host or gateway. (Provide only the command name with or without path information) **Answer:** Explanation: ping, /bin/ping

NEW QUESTION: 2 Content that is saved in personal and shared folders can be browsed by using which view? **A.** New -> Analysis **B.** Favorites **C.** Dashboard **D.** Home **E.** Catalog **Answer: E**
Explanation: The Catalog Manager workspace enables you to view and work with catalog objects. It displays the following folders for an open catalog: The shared folder - Contains content that is shared among catalog users. This includes the preconfigured dashboards and analyses that are distributed with prebuilt applications, and other objects such as shared filters. The system folder - Contains administrative elements of Presentation Services. Some of these elements are distributed with the product, and others are configured by you as the administrator, such as privileges. Avoid modifying any files in this folder. Presentation Services uses these files internally and modifying them might cause unexpected results. The users folder - Contains content that catalog users with the appropriate permissions have saved to their personal folders, such as individual analyses.
