NEW QUESTION: 1 Which of the following will you consider as a "role" under a role based access control system?
A. Bank network
B. Bank computer
C. Bank rules
D. Bank teller
Answer: D
Explanation: With role-based access control, access rights are grouped by role name, and the use of resources is restricted to individuals authorized to assume the associated role. For example, within a hospital system the role of doctor can include operations to perform diagnosis, prescribe medication, and order laboratory tests; and the role of researcher can be limited to gathering anonymous clinical information for studies.
