NEW QUESTION: 1 At Universal Containers, the Sales VP likes to re-assign Opportunity Teams every six months. Each Opportunity Team has the following resources:- AE (owner)- Sales Engineer-Vertical Overlay- Sales Ops What should the Architect use to re-assign Opportunity Team members so they have access to the appropriate Opportunity records? Choose one answer: **A.** From the User Setup menu, click "Update Team members on open Opportunities." **B.** From the Opportunity record detail page, use the "Update Team Members" function. **C.** Build a Visualforce page that will query the default team and update open Opportunities. **D.** Use the Mass Reassign Opportunity Team wizard on the Opportunity Tab Home Page. **Answer: D**

NEW QUESTION: 2 Which statement below is correct regarding VLANs? **A.** A VLAN is less secure when implemented in conjunction with private port switching. **B.** A VLAN is a network segmented physically, not logically. **C.** A VLAN restricts flooding to only those ports included in the VLAN. **D.** A closed VLAN configuration is the least secure VLAN configuration. **Answer: C**
Explanation: A virtual local area network (VLAN) allows ports on the same or different switches to be grouped so that traffic is confined to members of that group only, and restricts broadcast, unicast, and multicast traffic. Answer "A VLAN is a network segmented physically, not logically" is incorrect, because a VLAN is segmented logically, rather than physically. Answer "A VLAN is less secure when implemented in conjunction with private port switching" is incorrect. When a VLAN is implemented with private port, or single-user, switching, it provides fairly stringent security because broadcast vulnerabilities are minimized. Answer "A closed VLAN configuration is the least secure VLAN configuration" is incorrect, as a closed VLAN authenticates a user to an access control list on a central authentication server, where they are assigned authorization parameters to determine their level of network access.
