If you are a new comer for our ISTQB-CTFL practice engine, you may doubt a lot on the quality, the pass rate, the accuracy and so on.

NEW QUESTION: 1Which of the following would an attacker use to penetrate and capture additional traffic prior to performing an IV attack?**A.** Replay attack**B.** DDoS**C.** DNS poisoning**D.** Dictionary attacks**Answer: D**

NEW QUESTION: 2What VPN feature allows traffic to exit the security appliance through the same interface it entered?**A.** hairpinning**B.** NAT traversal**C.** split tunneling**D.** NAT**Answer: A**
Explanation:In network computing, hairpinning (or NAT loopback) describes a communication between two hosts behind the same NAT device using their mapped endpoint. Because not all NAT devices support this communication configuration, applications must be aware of it. Hairpinning is where a machine on the LAN is able to access another machine on the LAN via the external IP address of the LAN/router (with port forwarding set up on the router to direct requests to the appropriate machine on the LAN).Source:
<https://en.wikipedia.org/wiki/Hairpinning>

NEW QUESTION: 3You work as an administrator at Contoso.com. The Contoso.com network consists of a single domain named Contoso.com. All servers in the Contoso.com domain, including domain controllers, have Windows Server 2012 R2 installed. Contoso.com has a domain controller, named ENSUREPASS-DC01. You have been instructed to make sure that the Group Policy Administrative Templates are available centrally. Which of the following actions should you take?**A.** You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's logonserver folder.**B.** You should consider copying the policies folder to the PolicyDefinitions folder in the Contoso.com domain's SYSVOL folder.**C.** You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's systemroot folder.**D.** You should consider copying the PolicyDefinitions folder to the policies folder in the Contoso.com domain's SYSVOL folder.**Answer: D**
Explanation:PolicyDefinitions folder within the SYSVOL folder hierarchy. By placing the ADMX files in this directory, they are replicated to every DC in the domain; by extension, the ADMX-aware Group Policy Management Console in Windows Vista, Windows 7, Windows Server 2008 and R2 can check this folder as an additional source of ADMX files, and will report them accordingly when setting your policies. By default, the folder is not created. Whether you are a single DC or several thousand, I would strongly recommend you create a Central Store and start

using it for all your ADMX file storage. It really does work well. The Central Store To take advantage of the benefits of .admx files, you must create a Central Store in the SYSVOL folder on a domain controller. The Central Store is a file location that is checked by the Group Policy tools. The Group Policy tools use any .admx files that are in the Central Store. The files that are in the Central Store are later replicated to all domain controllers in the domain. To create a Central Store for .admx and .adml files, create a folder that is named PolicyDefinitions in the following location: \FQDN\SYSVOL\FQDN\policies. Note: FQDN is a fully qualified domain name.

NEW QUESTION: 4 What are the two advantages of using a spreadsheet for correcting invoice import errors? (Choose two.)
A. identification of errors with clear error messages at the invoice header and line levels
B. ability to correct errors within the spreadsheet and send invoice corrections for approval
C. ability to enter a high volume of invoices via a spreadsheet
D. ability to correct errors and re-import invoices directly from a spreadsheet
E. identification of errors with clear error messages at the invoice header level only
Answer: C, D
Explanation: Explanation A: You can fix the interface table data using the Correct Import Errors spreadsheet and resubmits the import process. E: Consider using the spreadsheet to expedite high volume invoice entry for simple invoices that don't require extensive validation. Create invoices with similar lines. Maximize the use of spreadsheet features, such as copy and paste, or hide and unhide.
