Photoexperienceacademy aids you to evacuate all your uncertainties with its free demo before purchasing SAP C\_FIORD\_2404 exam dumps, High Success Rate, No help, full refund!.

We always put the information security in the first place, About considerate after service, So whether you are newbie or regular customers of our C\_FIORD\_2404 practice materials, you will be success and always harvest in the future.

**NEW QUESTION: 1** Which of the following is a type of countermeasure that can be deployed to ensure that a threat vector does not meet a vulnerability? **A.** Prevention controls **B.** Monitoring controls **C.** Subversive controls **D.** Detection controls **Answer: A**

**NEW QUESTION: 2** You have Cloud Functions written in Node.js that pull messages from Cloud Pub/Sub and send the data to BigQuery. You observe that the message processing rate on the Pub/Sub topic is orders of magnitude higher than anticipated, but there is no error logged in Stackdriver Log Viewer. What are the two most likely causes of this problem? (Choose two.) **A.** Total outstanding messages exceed the 10-MB maximum. **B.** Publisher throughput quota is too small. **C.** The subscriber code does not acknowledge the messages that it pulls. **D.** Error handling in the subscriber code is not handling run-time errors properly. **E.** The subscriber code cannot keep up with the messages. **Answer: C, D** Explanation: C, E: By not acknowledging the pulled message, this result in it be putted back in Cloud Pub/Sub, meaning the messages accumulate instead of being consumed and removed from Pub/Sub. The same thing can happen if the subscriber maintains the lease on the message it receives in case of an error. This reduces the overall rate of processing because messages get stuck on the first subscriber. Also, errors in Cloud Function do not show up in Stackdriver Log Viewer if they are not correctly handled. A: No problem with publisher rate as the observed result is a higher number of messages and not a lower number. B: if messages exceed the 10MB maximum, they cannot be published. D: Cloud Functions automatically scales so they should be able to keep up.

**NEW QUESTION: 3** Your client wants space required for the virtual disk to be allocated when the virtual disk is created. Also, any data remaining on the physical device should not be erased during creation, but be zeroed out on demand, at a later time, on the first write from the virtual machine. Which storage provision type would you use to meet the client's requirements? **A.** thin LUN provisioning, eager zeroing **B.** thick LUN provisioning, lazy zeroing **C.** thick LUN provisioning, eager zeroing **D.** thin LUN provisioning, lazy zeroing **Answer: B**

**NEW QUESTION: 4** View Composerはどのデータベースバージョンをサポートしていますか？ **A.** Microsoft SQL Server 2008 SP1 **B.** Oracle 11g **C.** Microsoft SQL Server 2012 **D.** vPostgres **Answer: C**
