NEW QUESTION: 1You have been asked to complete an HR audit of your organization. Which of the following is NOT a tool or technique that's appropriate for an HR audit?**A.** Classroom training**B.** Questionnaires of employees and management**C.** Surveys**D.** Checklists**Answer: A**
Explanation:Reference: Professional in Human Resources Certification Study Guide, Sybex, ISBN: 9780-470-43096-5. Chapter Four: Workforce Planning and Employment. Official PHR and SPHR Certification Guide, HR Certification Institute, ISBN: 978-1-586-44149-4, Section III, The US Body of Knowledge.Chapter: Human Resource DevelopmentObjective: Talent Management

NEW QUESTION: 2Use the following login credentials as needed:To enter your username, place your cursor in the Sign in box and click on the username below.To enter your password, place your cursor in the Enter password box and click on the password below.Microsoft 365 Username: [\[email protected\]](#)Microsoft 365 Password: b#nqvZG*0w*4The following information is for technical support purposes only:Lab instance: 10658557You need to prevent a user named Admin1 from modifying his membership in any distribution groups that other users have created. The solution must apply only to Admin1.To complete this task, sign in to the Microsoft 365 admin center.**Answer:** Explanation:See explanation below.ExplanationYou need to create a new Role Assignment Policy that applies only to Admin1. The default policy which applies to all users allows users to modify their membership in distribution groups.1. Go to the Exchange Admin Center.2. Click on 'permissions' then 'user roles'.3. Click the plus (+) sign to create a new role assignment policy.4. Give the policy a name such as 'Admin1 policy'.5. Tick all the checkboxes except for 'MyDistributionGroupMembership'. This options allows users to modify their membership in distribution groups so leaving it unticked will prevent that.6. Click Save to create the policy.7. Now we need to apply the policy to Admin1. Click recipients, and

then click mailboxes.8. Select the Admin1 mailbox and click the Edit icon (pencil icon).9. In the mailbox details window, click mailbox features.10. Click the Role Assignment drop down list and select the new role assignment policy.11. Click Save to save the changes.References: <https://docs.microsoft.com/en-us/exchange/troubleshoot/distribution-groups/prevent-users-create-manage-dg>

NEW QUESTION: 3Your network contains an Active Directory domain named contoso.com. All client computers run Windows 10. You plan to deploy a Remote Desktop connection solution for the client computers. You have four available servers in the domain that can be configured as Remote Desktop servers. The servers are configured as shown in the following table. You need to ensure that all Remote Desktop connections can be protected by using Remote Credential Guard. Solution: You deploy the Remote Desktop connection solution by using Server4. Does this meet the goal? **A. No** **B. Yes** **Answer: A** **Explanation:** Explanation No, as Server4 is a Windows Server 2012R2 which does not meet the requirements of Remote Credential Guard. <https://docs.microsoft.com/en-us/windows/access-protection/remote-credential-guard> Remote Credential Guard requirements To use Windows Defender Remote Credential Guard, the Remote Desktop client and remote host must meet the following requirements: The Remote Desktop client device: Must be running at least Windows 10, version 1703 to be able to supply credentials. Must be running at least Windows 10, version 1607 or Windows Server 2016 to use the user's signed-in credentials. This requires the user's account be able to sign in to both the client device and the remote host. Must be running the Remote Desktop Classic Windows application. The Remote Desktop Universal Windows application doesn't support Windows Defender Remote Credential Guard. Must use Kerberos authentication to connect to the remote host. If the client cannot connect to a domain controller, then RDP attempts to fall back to NTLM. Windows Defender Remote Credential Guard does not allow NTLM fallback because this would expose credentials to risk. The Remote Desktop remote host: Must be running at least Windows 10, version 1607 or Windows Server 2016. Must allow Restricted Admin connections. w the client's domain user to access Remote Desktop connections. Must allow delegation of non-exportable credentials.
