Our website promises that you can pass test at your first time to participate in the INTE exam dumps and enhance yourself by practicing exam questions.

NEW QUESTION: 1A. Option AB. Option DC. Option CD. Option BAnswer: DExplanation:The Object Request Broker (ORB) pass by reference option determines if pass by reference or pass by value semantics should be used when handling parameter objects involved in an EJB request. This option can be found in the administrative console by navigating to Servers => Application Servers => server_name => Object Request Broker(ORB). By default, this option is disabled and a copy of each parameter object is made and passed to the invoked EJB method. This is considerably more expensive than passing a simple reference to the existing parameter object.References:
