NEW QUESTION: 1The network administrator wishes to terminate the VPN encryption on the Aruba controller.When writing a firewall rule to accomplish the task of automatically moving the VPN traffic for the wireless clients from a third party VPN concentrator to an Aruba controller, which action needs to be configured in the rule?**A.** source NAT**B.** redirect to ESI group**C.** redirect to tunnel**D.** destination NAT**Answer: D**

NEW QUESTION: 2Which of the following applet intrusion issues poses the GREATEST risk of disruption to an organization?**A.** Applets recording keystrokes and, therefore, passwords**B.** A program that deposits a virus on a client machine**C.** Downloaded code that reads files on a client's hard drive**D.** Applets opening connections from the client machine**Answer: D**
Explanation:An applet is a program downloaded from a web server to the client, usually through a web browser that provides functionality for database access, interactive web pages and communications with other users. Applets opening connections from the client machine to other machines on the network and damaging those machines, as a denial-of-service attack, pose the greatest threat to an organization and could disrupt business continuity. A program that deposits a virus on a client machine is referred to as a malicious attack (i.e., specifically meant to cause harm to a client machine), but may not necessarily result in a disruption of service. Applets that record keystrokes, and therefore, passwords, and downloaded code that reads files on a client's hard drive relate more to organizational privacy issues, and although significant, are less likely to cause a significant disruption of service.

NEW QUESTION: 3Which of the following members of the estate planning team is responsible for assuring that the client's intentions are expressed in documents that will carry out the final

plan? **A.** The life underwriter **B.** The investment counselor **C.** The lawyer **D.** The trust officer
Answer: C
