NEW QUESTION: 1 The incident response team has completed root cause analysis for an incident. Which of the following actions should be taken in the next phase of the incident response process? (Choose two.)**A.** Training staff for future incidents**B.** Investigating responsible staff**C.** Updating policies and procedures**D.** Drafting a recovery plan for the incident**E.** Providing a briefing to management**Answer: C,D**

NEW QUESTION: 2 Crosswind Custom Homes is building a customer's dream house. However, rain has delayed the finish by two weeks. The schedule shows that the next activity is to install the roof, then that is followed by the shingles. This is an example of what?**A.** Discretionary dependencies**B.** Mandatory dependencies**C.** Lag**D.** Crashing**Answer: B**

NEW QUESTION: 3 The client has implemented revenue policy with time-based contingencies. An invoice for a creditworthy customer is imported and one of the invoice lines is associated with both a nonstandard refund policy (60 days) and acceptance clause (100 days). Explain when revenue will be recognized.**A.** Recognized after 100 days**B.** Recognized Immediately**C.** Recognized after 60 days**D.** Recognized only after manual intervention**Answer: A**Explanation: Example:You enter or import an invoice for a creditworthy customer, and one of the invoice lines isassociated with both a nonstandard refund policy (50 days) and an acceptance clause (120 days).Receivables does not recognize revenue on this invoice line until the acceptance

clause expiresafter 120 days. If, for example, you obtain written acceptance from the customer after 80 days, youcan record early acceptance to allow revenue recognition.Reference: Oracle Fusion Applications Order Fulfillment, Receivables, Payments, Cash, andCollections Guide , Two time-based contingencies on the same invoice line

NEW QUESTION: 4 Customers have recently reported incomplete purchase history and other anomalies while accessing their account history on the web server farm. Upon investigation, it has been determined that there are version mismatches of key e-commerce applications on the production web servers. The development team has direct access to the production servers and is most likely the cause of the different release versions. Which of the following process level solutions would address this problem?**A.** Change development methodology from strict waterfall to agile.**B.** Implement change control practices at the organization level.**C.** Update the vulnerability management plan to address data discrepancy issues.**D.** Adjust the firewall ACL to prohibit development from directly accessing the production server farm.**Answer: B** Explanation:Change control and change management defines policies and practices to manage changes made to a system. It ensures that changes to a system occur in an orderly process.
