NEW QUESTION: 1A 35-year-old client is admitted to the hospital for elective tubal ligation. While the nurse is doing preoperative teaching, the client says, "The anesthesiologist said she was going to give me balanced anesthesia. What exactly is that?" The best explanation for the nurse to give the client would be that balanced anesthesia:**A.** Is a combination of several anesthetic agents or drugs producing a smooth induction and minimal complications**B.** Does not depress the central nervous system**C.** Is a type of regional anesthesia**D.** Uses equal amounts of inhalation agents and liquid agents**Answer: A****Explanation:**(A) Regional anesthesia does not produce loss of consciousness and is indicated for excision of moles, cysts, and endoscopic surgeries. (B) Varying amounts of anesthetic agents are used when employing balanced anesthesia. Amounts depend on age, weight, condition of the client, and surgical procedure. (C) General anesthesia is a drug-induced depression of the central nervous system that produces loss of consciousness and decreased muscle activity. (D) Balanced anesthesia is a combination of a number of anesthetic agents that produce a smooth induction, appropriate depth of anesthesia, and appropriate muscle relaxation with minimal complications.

NEW QUESTION: 2A. DNS Manager**B.** Active Directory Sites and Services**C.** Active Directory Domains and Trusts**D.** Ntdsutil**Answer: B****Explanation:**A. To control replication between two sites, you can use the Active Directory Sites and Services snap-in to configure settings on the site link object to which the sites are added. By configuring settings on a site link, you can control when replication occurs between two or more sites, and how often.B. Ntdsutil.exe is a command-line tool that provides management facilities for Active Directory Domain Services (AD DS) and Active Directory Lightweight Directory Services (AD LDS). You can use the ntdsutil commands to perform database maintenance of AD DS, manage and control single master operations, and remove metadata left behind by domain controllers that were removed from the network without being properly uninstalled.C. DNS Manager is the tool you'll use to manage local and remote DNS ServersD. Active Directory Domains and Trusts is the Microsoft Management Console (MMC) snap-in that you can use to administer domain trusts, domain and forest functional levels, and user principal name (UPN) suffixes.

<http://technet.microsoft.com/en-us/library/cc770299.aspx>Note: If you see question about AD Replication, First preference is AD sites and services, then Repadmin and then DNSLINT.

NEW QUESTION: 3 DRAG DROP You need to configure the Berlin public switched telephone network (PSTN) usages and voice routes. In which order will the PSTN usage policies be applied? To answer, move all PSTN usage policies from the list of PSTN usage policies to the answer area and arrange them in which they should be applied. Select and Place: **Answer:**

Explanation: Explanation/Reference: Testlet 1 Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview General Overview Contoso, Ltd., is a manufacturing company that has 4,000 employees. The company has a sales department, a marketing department, a research department, and a human resources department.

Physical Locations The company has four offices. The offices are configured as shown in the following table: The New York office contains the main data center. Communications for all of the offices is routed through the New York office. All telephone calls from the Los Angeles office and the Miami office are routed through a public switched telephone network (PSTN) gateway in the New York office. All offices connect to each other by using a wide area network (WAN) link. Each office connects directly to the Internet.

Existing Environment Active Directory Environment The company has an Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2008 R2. Each office contains two domain controllers. Each office is configured as an AD DS site. Each office contains DHCP servers that run on 32-bit servers.

Skype for Business Server Environment The company has nine servers. The servers are configured as shown in the following table: The company uses a SIP domain of contoso.com. The voice infrastructure is configured as shown in the following table: All users are enabled for Enterprise Voice. The company also contains the Edge environment configured as shown in the following table: The Miami office has a dial plan. The dial plan is configured as shown in the following table: The Skype for Business server configuration has five routes. Location-based routing is not configured. The routes are configured as shown in the following table: The PSTN usage for the users in the Los Angeles Office is configured as shown in the following table:

Problem Statements The company identifies the following issues with the current infrastructure: Los Angeles users report that the audio quality during calls to the New York office is poor and that the calls often disconnect. Users in the Miami office report that when their WAN link fails, they cannot establish calls to the PSTN. The Miami users report that they cannot call the Los Angeles users by using a five-digit internal phone number.

Requirements Planned Changes The company plans to implement the following changes: Provide voice resiliency in all of the offices if a WAN link fails. Implement Call Park. Implement an unassigned number range that has a voice announcement. Add an additional auto attendant. Implement a gateway in the Los Angeles Office that uses the local PSTN. Migrate several users to Skype for Business Online. The users will use instant messaging (IM) with Skype for Business users only. Client computers will use automatic configuration and open federation. The migrated users will use a SIP domain of cloud.contoso.com. Provide a backup route for each office if a gateway fails. Provide each office with access to the local PSTN.

Technical Requirements The company

identifies the following technical requirements: Enable five-digit internal dialing that uses the site code and the last four digits of the phone number range. Configure the New York gateway as the backup route for the local gateway in each office. Business Requirements Changes to the infrastructure must minimize the number of new servers deployed.

NEW QUESTION: 4 展示を参照してください。

管理者が新しいCisco FTD デバイスをネットワークに追加している

Cisco FTM で管理したいと考えています。Cisco FTD は NAT デバイスの背後にありません。Cisco FTD でこれを有効にするには、どのコマンドが必要ですか。
A. configure manager add DONTRESOLVE kregistration key
B. configure manager add <FMC IP address> <registration key>
C. configure manager add DONTRESOLVE <登録キー> FTD123
D. configure manager add <FMC IP address> <registration key> 16
Answer: B
