And our pass rate for D-PM-MN-23 exam questions is high as more than 98%, Selecting our D-PM-MN-23 study materials is definitely your right decision, With the help of our D-PM-MN-23 exam collection materials, passing EMC D-PM-MN-23 exam will just become your minimum target and you can achieve far more than this, you can reach bigger aim than what you have thought before.

**NEW QUESTION: 1** On the Cisco Nexus 7000 Series Switch, what could be the reason why the (config- vlan)#private-vlan primary command fails?**A.** You are using a reserved VLAN ID.**B.** The VLAN does not exist.**C.** There are not enough resources in the VDC.**D.** The interface is in the wrong VRF.**E.** The PVLAN feature is not enabled.**F.** The VLAN is a secondary VLAN.**Answer: E**

**NEW QUESTION: 2** Your network contains servers that run Windows Server 2008. Microsoft Windows SharePoint Services (WSS) are available on the network. WSS is only accessible from the internal network. Several users use devices that run Windows Mobile 6.0. The users can establish only HTTP and HTTPS sessions from the Internet. You need to enable users to access WSS from the Internet by using their Windows Mobile devices. The solution must ensure that all connections from the Internet to WSS are encrypted. What should you do?**A.** Install Microsoft Internet Security and Acceleration (ISA) Server 2006 and create a HTTPS publishing rule.**B.** Install the Network Policy and Access Services (NPAS) role and enable Secure Socket Tunneling (SSTP) connections. Configure WSS to require Kerberos authentication.**C.** Install Microsoft Internet Security and Acceleration (ISA) Server 2006 and create a Secure RPC publishing rule.**D.** Install the Network Policy and Access Services (NPAS) role and enable Secure Socket Tunneling (SSTP) connections. Configure WSS to require IPsec encryption.**Answer: A**  
**Explanation:** Explanation/Reference: To ensure that mobile users are allowed to access WSS from the Internet by using their Windows Mobile devices securely and to ensure that all the connections from the Internet to WSS are encrypted, you need to use external Firewall solution by using Microsoft Internet Security and Acceleration ISA Server 2006 and create a HTTPS publishing rule on ISA Server. The Firewall will ensure a secure connection to the internal network of the company. When you publish an application through ISA Server 2006, you are protecting the server from direct external access because the name and IP address of the server are not accessible to the user. The user accesses the ISA Server computer, which then forwards the request to the server according to the conditions of the server publishing rule. When you create a secure Web publishing rule, you can configure how SSL requests will be redirected as Hypertext Transfer Protocol (HTTP) requests or as SSL requests. Reference: Deploying Office SharePoint Server 2007 with ISA Server 2006 / No direct access to the server from the Internet <http://technet.microsoft.com/en-us/library/cc268368.aspx>

**NEW QUESTION: 3** Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. You create a central store for Group Policy. You

receive a custom administrative template named Template1.admx. You need to ensure that the settings in Template1.admx appear in all new Group Policy objects (GPOs). What should you do?

**A.** From the Default Domain Policy, add Template1.admx to the Administrative Templates. **B.** Copy Template1.admx to \Contoso.com\SYSVOL\Contoso.com\Policies\PolicyDefinitions. **C.** From the Default Domain Controllers Policy, add Template1.admx to the Administrative Templates. **D.** Copy Template1.admx to \Contoso.com\NETLOGON. **Answer: B**

**Explanation/Reference:** Explanation: Unlike ADM files, ADMX files are not stored in individual GPOs. For domain-based enterprises, administrators can create a central store location of ADMX files that is accessible by anyone with permission to create or edit GPOs.
