NEW QUESTION: 2 Scenario:Following the merger of two online entertainment companies, management is integrating the two distinct service systems that were individually built and optimized prior to the acquisition. Reducing IT costs is a major goal, but the company also wants a system infrastructure that allows quick, flexible handling of the online content requests, and that is highly reliable and has excellent expandability. The newly merged company is expanding its web-based music entertainment services by establishing a mobile content business model and launching a comprehensive community site that allows multiple

consumers access to content in collaboration with PCs and cell phones. The multiple consumer web service includes video files. which occupy 90% or more of the total capacity and require an average of 400 Mbps network bandwidth for content distribution. These files piece a heavy burden on the distribution system. and this has prompted the company to consider a virtual server environment. They need to achieve this without lowering service quality.Some of the additional business criteria identified in customer planning interviews includes:-Twenty or more physical servers need to be integrate into just three units -The storage environment, previously structured as individual server units, requires shifting toshared storage using a Storage Area Network (SAN) -Increase the overall system reliability by consolidating the system environment. -Not interested in direct-attached storage. Shared storage makes it possible to increase usageefficiency above that offered by direct-attached storage, and also adds a cost advantage. -Management of all storage, HBAs. and switches should be done from a GUI-based dashboard . -Multiple solutions, prioritized with a recommendationRefer to the scenario.Which software component meets the company business requirements?**A.** HP MDS Fabric Manager Server**B.** Advanced Zoning**C.** Brocade Fabric Watch**D.** HP SAN Connection Manager**Answer: A**
