Make sure that you are going through our D-CIS-FN-23 pdf questions multiple times so you can ensure your success in the exam, You can visit our recommendation section and read the first-hand experience of verified users.

This is doubly true for IT field.

NEW QUESTION: 1 Refer to the exhibit. Switch A, B, and C are trunked together and have been properly configured for VTP. Switch B has all VLANs, but Switch C is not receiving traffic from certain VLANs. What would cause this issue?
A. A VTP authentication mismatch occurred between Switch A and Switch B.
B. VTP pruning is configured globally on all switches and it removed VLANs from the trunk interface that is connected to Switch C.
C. The VTP revision number of Switch B is higher than that of Switch A.
D. The trunk between Switch A and Switch B is misconfigured.
Answer: B
Explanation: Explanation/Reference: Explanation: VTP pruning increases network available bandwidth by restricting flooded traffic to those trunk links that the traffic must use to reach the destination devices. Without VTP pruning, a switch floods broadcast, multicast, and unknown unicast traffic across all trunk links within a VTP domain even though receiving switches might discard them. VTP pruning is disabled by default. VTP pruning blocks unneeded flooded traffic to VLANs on trunk ports that are included in the pruning-eligible list. The best explanation for why switch C is not seeing traffic from only some of the VLANs, is that VTP pruning has been configured.

NEW QUESTION: 2 When should a post-mortem review meeting be held after an intrusion has been properly taken care of?
A. Within the first three months after the investigation of the intrusion is completed.
B. Within the first week after prosecution of intruders have taken place, whether successful or not.
C. Within the first week of completing the investigation of the intrusion.
D. Within the first month after the investigation of the intrusion is completed.
Answer: C
Explanation: Explanation/Reference: A post-mortem review meeting should be held with all involved parties within three to five working days of completing the investigation of the intrusion. Otherwise, participants are likely to forget critical information. Even if it enabled an organization to validate the correctness of its chain of custody of evidence, it would not make sense to wait until prosecution is complete because it would take too much time and many cases of intrusion never get to court anyway. Source: ALLEN, Julia H., The CERT Guide to System and Network Security Practices, Addison-Wesley, 2001, Chapter 7: Responding to Intrusions (page 297).

NEW QUESTION: 3 A. IP Pools B. MAC Sets C. L2 bridges D. IP Sets E. Transport Zones
Answer: B, D, E
Explanation:
<https://docs.vmware.com/en/VMware-NSX-for-vSphere/6.3/com.vmware.nsx.admin.doc/GUID-229D0501-836E-4788-A72E-4D3DEBF2B26D.html>

NEW QUESTION: 4What information must be on the loan application registers for home loans on property located within the bank's metropolitan area?**A.** The county, address, and fair market value of the property**B.** The address, census tract, and metropolitan area of the property**C.** The name, address, and metropolitan area of the applicant**D.** The county, census tract, and metropolitan area of the property**Answer: D**
