Our CIS-VR exam questions will be a good option for you, To prepare for your real CIS-VR exam easily, use our pdf questions and answers that are available in an easy format.

NEW QUESTION: 1You receive data files in CSV format monthly from a third party. You need to cleanse this data, but every third month the schema of the files changes. Your requirements for implementing these transformations include:
* Executing the transformations on a schedule
* Enabling non-developer analysts to modify transformations
* Providing a graphical tool for designing transformations
What should you do?
A. Load each month's CSV data into BigQuery, and write a SQL query to transform the data to a standard schema. Merge the transformed tables together with a SQL query
B. Help the analysts write a Cloud Dataflow pipeline in Python to perform the transformation. The Python code should be stored in a revision control system and modified as the incoming data's schema changes
C. Use Apache Spark on Cloud Dataproc to infer the schema of the CSV file before creating a Dataframe. Then implement the transformations in Spark SQL before writing the data out to Cloud Storage and loading into BigQuery
D. Use Cloud Dataprep to build and maintain the transformation recipes, and execute them on a scheduled basis
Answer: D

NEW QUESTION: 2What is true about the community string used for SNMPv1 and SNMPv2c?
A. The community string is like a password transmitted in cleartext, providing no data integrity or privacy.
B. The community string encrypts the SNMP message, but does not hash it, providing for data privacy.
C. The community string hashes the SNMP message, but does not encrypt it, providing for data integrity.
D. The community string encrypts and hashes the SNMP message, providing for data integrity and privacy.
Answer: A

NEW QUESTION: 3**A.** Option A
B. Option B
C. Option C
D. Option D
Answer: D
Explanation:
* You can take an online tablespace offline so that it is temporarily unavailable for general use. The rest of the database remains open and available for users to access data. Conversely, you can bring an offline tablespace online to make the schema objects within the tablespace available to database users. The database must be open to alter the availability of a tablespace.
