NEW QUESTION: 1One of the activities of Release and deployment management involves testing and Release acceptance. When can Release management start with implementation planning?**A.** As soon as the documentation for managing and supporting the Release is also complete and up to date.**B.** As soon as the users have tested the Release.**C.** As soon as Change management has approved the Release.**D.** As soon as the technicians have tested the Release and no adverse impact of this Release is expected in the rest of the IT infrastructure.**Answer: C**

NEW QUESTION: 2You are a Dynamics 365 for Customer Service system administrator. You have a data file that contains a list of accounts which must be important into the system. You need to import the accounts by using the Import Data wizard. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation: Explanation: <https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/basics/import-accounts-leads-other-data>

NEW QUESTION: 3You have sales data in a star schema that contains four tables named Sales, Customer, Date, and Product. The Sales table contains purchase and ship dates. Most often, you will use the purchase date to analyze the data, but you will analyze the data by both dates independently and together. You need to design an imported dataset to support the analysis. The solution must minimize the model size and the number of queries against the data source. Which data modeling design should you use?**A.** Use the Auto Date/Time functionality in Microsoft Power BI and do NOT import the Date table.**B.** Duplicate the Date query in Power Query and use active relationships between both Date tables.**C.** Create an active relationship between Sales and Date for the purchase date and an inactive relationship for the ship date.**D.** On the Date table, use a reference query in Power Query and create active relationships between Sales and both Date tables in the modeling view.**Answer: C** Explanation: Only one relationship can be active. Note: If you query two or more tables at the same time, when the data is loaded, Power BI Desktop attempts to find and create relationships for you. The relationship options Cardinality, Cross filter direction, and Make this relationship active are automatically set.
