Up to now, our C_CPE_16 training material has won thousands of people' s support, What was your original intention of choosing a product?

NEW QUESTION: 1A. Option DB. Option BC. Option CD. Option EE. Option AAnswer: A,D

Explanation:D: The database internally uses standard file system interfaces to create and delete files as needed for the following database structures:TablespacesRedo log filesControl filesArchived logsBlock change tracking filesFlashback logsRMAN backupsNote:* Using Oracle-managed files simplifies the administration of an Oracle Database. Oracle- managed files eliminate the need for you, the DBA, to directly manage the operating system files that make up an Oracle Database. With Oracle-managed files, you specify file system directories in which the database automatically creates, names, and manages files at the database object level. For example, you need only specify that you want to create a tablespace; you do not need to specify the name and path of the tablespace's datafile with the DATAFILE clause.
