NEW QUESTION: 1 Zwitter ion reacts with a substrate as:
A. Proton donor ion
B. Neutral ion
C. Proton acceptor ion
D. Anionic
E. Cationic
Answer: B

NEW QUESTION: 2 Your company deploys thousands of sensors. You plan to join the data from the sensors by using Azure Data Factory. The reference data file refreshes every 30 minutes. You need to include the path to the reference data in Data Factory. Which path should you include?
A. products/{date}/{time}/product_list.json
B. products/{sensor_name}/product_list.json
C. products/{batch}/product_list.json
D. products/{time}/product_list.json
Answer: A
Explanation: Stream Analytics supports taking reference data stored in Azure blob storage as one of the "inputs" for the job. To enable support for refreshing reference data the user needs to specify a list of blobs in the input configuration using the {date} and {time} tokens inside the path pattern. The job will load the corresponding blob based on the date and time encoded in the blob names using UTC time zone. For example if the job has a reference input configured in the portal with the path pattern such as: /referencedata/{date}/{time}/customertable.csv where the date format is "YYYY/MM/DD" and the time format is "HH/mm" then the job will pick up a file named /referencedata/2015/07/26/08/30/ customertable.csv at 8:30 AM on July 26th 2015 UTC time zone.

NEW QUESTION: 3 An AOS-Switch uses tunneled node. What is a best practice for the path between an AOS-Switch and its Mobility Controller?
A. The path has a device that applies NAT
B. The path crosses no VLAN boundaries
C. The path can support jumbo frames
D. The path implements MACsec
Answer: C

NEW QUESTION: 4 You need to meet the requirement for the legal department. Which three actions should you perform in sequence from the Security & Compliance admin center? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer: Explanation: References:
