**Answer: B**

**NEW QUESTION: 3** **A.** Option D  
**B.** Option C  
**C.** Option A  
**D.** Option B  
**Answer: C**

**NEW QUESTION: 4** Consider the following computer applications:  
(a) At a catalog sales firm, as phone orders are entered into their computer, both inventory and credit are immediately checked.  
(b) A manufacturer's computer sends the coming week's production schedule and parts orders to a supplier's computer.  
Which statement below is true for these applications?  
**A.** Both applications are examples of online real-time processing OLRT  
**B.** The first application is an example of EDI and the second an example of OLRT  
**C.** The first application is an example of

OLRT and the second an example of EDI. Both applications are examples of electronic data interchange EDI. **Answer: C** Explanation: The catalog sales firm is using an online processing system known as an online, real-time system OLRT). OLRT systems handle transactions as they are entered, processing the input and providing output soon enough to affect a current decision making process, e.g., inventory and credit status of phone call orders. The sending of upcoming production schedules and parts orders by and manufacturer's computer to a supplier's computer is an example of electronic data interchange EDI). EDI is the communication of electronic documents directly from one entity's computer to another's computer.
