**NEW QUESTION: 3**You manage a Microsoft SQL Server environment. You plan to configure Database Mail.You need to ensure that all users can access a private Database Mail profile.What should you do?**A.** On the profile, grant access to the public user.**B.** On the master database, add the DatabaseMailUserRole to the public user.**C.** On the msdb database, add the DatabaseMailUserRole to the public user.**D.** On the tempdb database, add the DatabaseMailUserRole to userid 0.**Answer: C****Explanation:**For each private profile, Database Mail maintains a list of users that are permitted to send e-mail using that profile. Public profiles are available to users or roles in the msdb database who are also members of the DatabaseMailUserRole.By default, a profile is private, and no users are granted access to the profile. To make the profile public, grant access to the user 'public' or the user id 0.**Note:** Profiles are either public or private. A private profile is accessible only to specific users or roles. A public profile allows any user or role with access to the mail host database (msdb) to send e-mail using that profile.**References:**
