The PEGACPDC23V1 exam torrent can prove your ability to let more big company to attention you, The PDF version of PEGACPDC23V1 practice guide can be printed so that you can take it wherever you go.

We have hired the most authoritative professionals to compile the content Of the PEGACPDC23V1 study materials.

NEW QUESTION: 1You need to recommend a solution for App1. The solution must meet the technical requirements. What should you include in the recommendation? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.
Answer: Explanation:Explanation:This reference architecture shows how to deploy VMs and a virtual network configured for an N-tier application, using SQL Server on Windows for the data tier.Scenario: You have a public-facing application named App1. App1 is comprised of the following three tiers:* A SQL database* A web front end* A processing middle tierEach tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.* Technical requirements include:* Move all the virtual machines for App1 to Azure.* Minimize the number of open ports between the App1 tiers.References:
<https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/n-tier/n-tier-sql-server>

NEW QUESTION: 2どの製品がスケールアウト並列処理を提供し、IBM FlashSystemと統合すると、分析クラスターのパフォーマンスを劇的に加速しますか？**A.** IBM Spectrum Scale**B.** 柔軟なストレージ**C.** リアルタイム圧縮**D.** XIV**Answer: A**

NEW QUESTION: 3Case StudyThis is a case study. Case studies are not limited separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to

this section. To start the case study To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background You are developing a Universal Windows Platform (UWP) app for LitWare, Inc. that will assist video artists. The app allows artists to create videos, share videos through other mobile apps, and upload the videos through LitWare, Inc.'s web services. What helps set LitWare Inc.'s app apart from competitors is their focus on speed and performance.

Business Requirements

- Support many devices** Users may have phones, tablets, or laptops. The app must support all devices with a fluid layout that grows off-screen and adapts to each device.
- Record video** Users must be able to record videos and view them in their videos library. The app must display information about the recorded video. Users must be able to edit the upload queue in the app.
- Branding** The app must have consistent branding throughout all views.
- Upload videos** The app must allow deferral and scheduling of video uploads. Users must be able to view the status of uploaded videos. Any videos created with this app or shared with this app must be uploaded without user interaction.
- Download video** The app must have the option to automatically download videos. Users must be able to initiate downloading of videos.
- Share video** The app must allow be allowed to receive videos from other apps.

Technical Requirements

- Support multiple devices** The app must support the following:
 - Use horizontal layout for larger screens.
 - User vertical layout for smaller screens.
 - Use one layout control per view.
- The app must be compatible with current and future XBOX apps that use C++.
- Uploading and downloading** The app must use a background operations to upload and download videos.
- Code reuse** The app must use a common pool of XAML resources and custom controls. All custom controls must use a consistent theme throughout the app. You must create code that can be reused in C++, C#, JavaScript, whenever possible. The app must call the background service to avoid duplication of code.
- Security** End users must be authenticated using OAuth. Web services must be authenticated. Users must have the option to use single sign-on.
- Recording** The app must use the microphone and webcam to support audio and video recording. In addition, the app must support the use of the back and camera buttons, if present.
- Integration** Other apps must be able to share videos with this app through a Universal Windows Platform (UWP) app service.
- Architecture and coding style** The app must follow the Model-View-ViewModel (MVVM) pattern. The app's user interface (UI) must be optimized for performance. The app must use compile time coding techniques over runtime.

Application structure Package.appxmanifest

Relevant portions of the app files are shown below. Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

BackgroundTask.cs

Relevant portions of the app files are shown below. Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

You are a developer for Litware, Inc.'s Universal Windows Platform (UWP) app. Access to the hardware within the app is not functioning correctly. You need to add the capabilities to the package.appxmanifest file. Which markup segment should you insert at line PM16?

A. Option A
B. Option B
C. Option C
D. Option D

Answer: B

Explanation: Explanation/Reference: Explanation: From scenario: The app must use the microphone and webcam to support audio and video recording. In addition, the app must support the use of the back and camera buttons, if present. Users must be able to record videos and view them in their videos library.
