NEW QUESTION: 2You need to plan the expansion of the Los Angeles office.What should you do?**A.** Create and apply a Group Policy object to the Los Angeles site.**B.** Install a domain controller in Los Angeles.**C.** Create and apply a filtered attribute set to the Los Angeles site.**D.** Install a read-only domain controller in Los Angeles.**Answer: A**Explanation:Topic 8, Contoso Ltd, Case BBackgroundOverviewContoso, Ltd., is a software development company. Contoso has a main office in London and two branch offices, one in Madrid and the other in Dublin. The company is in the process of adopting Microsoft Azure to host business critical resources and applications.Contoso has an Active Directory Domain Services (AD DS) domain named contoso.com. All devices in the three offices are members of the domain. Each office has a dedicated organizational unit (OU) in the root of the domain named London, Madrid, and Dublin, respectively. Each office OU has three child OUs named Computers, Users, and Groups. The local Administrator account is disabled on all client devices in the domain by using a Group Policy object (GPO) named SecurityConfiguration that is linked to the root of the domain. Contoso's security department also has a GPO named WSUSConfiguration. WSUSConfiguration defines the configuration of Windows Update Services on the Windows Server Update Services (WSUS) server named WSUS1.You have a GPO named RemoteSales that uses a WMI filter. The GPO prevents users from launching applications that are not approved.DNS ServicesContoso uses a DNS service that is installed on two domain controllers in the main office. The domain controllers are named DO and DC2. Both DO and DC2 run Windows Server 2008 R2.Both domain controllers host Active Directory integrated zones named contoso.com and lab.contoso.com. The zones are configured to allow only secure updates.ResearchContoso creates a new research department to develop integration between Contoso's software and public cloud

services. Finance Department Users in the finance department use a client-server application named App1. App1 uses custom Active Directory attributes to store encryption keys. App1 is a business critical application that must be migrated to Windows Azure. A server named SERVER2 hosts App1. SERVER2 runs Windows Server 2008 R2. The disk configuration for SERVER2 is shown in the following table: A server named SERVER1 hosts a database that is used by App1. SERVER1 runs Windows Server 2008 R2 and SQL Server 2008 R2. The disk configuration for SERVER1 is shown in the following table: The Contoso management team plans to increase the use of App1. To accommodate these plans, the size of the database must be increased. Sales Department Users in the sales department use laptop computers when they travel. Salespeople use a legacy application named ContosoSales on their laptop computers. Salespeople can use a pool of shared desktop computers in each office. The ContosoSales app is dependent on a specific registry key that is frequently overwritten by third-party applications. This causes the ContosoSales app to stop working. Business Requirements All DNS servers must be placed in a physically secure location. Software development department All software developers must migrate their servers and workstations to the DNS domain lab.contoso.com to ensure that frequent changes to DNS do not interfere with the production environment. Finance department All servers that host App1 must be migrated to Windows Azure. A new Azure virtual machine (VM) named CLOUD2 must be deployed to Windows Azure. Sales department Users in the sales department should not be able to run applications on their laptop computers that are not approved by the security department. Users in the sales department should have no such restrictions while they work on the desktop computers in the office. Technical Requirements App1 requirements You have the following requirements: *The size of the database for App1 must be increased to 8 TB. *The encryption keys for App1 should not be replicated to the offices where physical server security is not guaranteed. *The amount of disk space that is used by Windows Azure must be minimized. Infrastructure requirements You have the following requirements: *The lab.contoso.com DNS domain zone must not be replicated or transferred to DNS servers outside of the London office. *A new DNS domain zone named research.contoso.com must be deployed for users in the research department. *The research.contoso.com DNS domain zone must be protected by using DNS Security Extensions (DNSSEC). *All computers in the London and Madrid offices must install Windows Updates from the server WSUS1. *A new domain controller for the contoso.com domain must be deployed in the Madrid office. *Replication traffic must be minimized when the new domain controllers are deployed. *New WMI filters must not conflict with existing WMI filters.
