We are rated as the 156-590 test king by our buyers and peers in this field, Just come and have a try on our 156-590 study questions, You can free download the 156-590 valid test training to have a try.

You can check the quality and features of 156-590 Check Point Certified Threat Prevention Specialist (CTPS) exam dumps.

NEW QUESTION: 1 A. Option AB. Option CC. Option BD. Option D **Answer: B** Explanation: A Virtual Private Cloud (VPC) is a virtual network dedicated to the user's AWS account. AWS provides two features that the user can use to increase security in VPC: security groups and network ACLs. Security groups work at the instance level. If the user is using the default security group, it will have a rule which allows the instances to communicate with other. For a new security group, the user has to specify the rule, add it to define the source as the security group itself, and select all the protocols and ports for that source.

NEW QUESTION: 2 When you start the X Window System, which series of programs and/or scripts would most closely describe the start-up process? **A.** startx -> xinit -> xinitrc -> Xclients **B.** startx -> xinit -> Xclients -> xinitrc **C.** xdm -> xinit -> xinitrc -> Xclients **D.** startx -> xinitrc -> Xclients -> kde **E.** kde -> xinitrc -> xinit -> Xclients **Answer: A**

NEW QUESTION: 3 What is a characteristic of asynchronous remote replication? **A.** A near-zero RPO disaster recovery solution **B.** Replica will be behind the source by at least the size of the buffer **C.** Deployed only for distances within 200 km between two sites **D.** Write must be committed at the target before being acknowledged as complete **Answer: B** Explanation: Asynchronous remote replication In asynchronous remote replication, a write is committed to the source and immediately acknowledged to the host. In this mode, data is buffered at the source and transmitted to the remote site later. Data at the remote site will be behind the source by at least the size of the buffer. Hence, asynchronous remote replication provides a finite (nonzero) RPO disaster recovery solution. EMC E10-001 Student Resource Guide. Module 12: Remote Replication
