ログイン方法は、これらのパラメーターを使用してルーターのVTY回線で構成されます。
-認証の最初の方法はTACACSです
-TACACSが利用できない場合、何も提供されなくてもログインが許可されます資格情報
このタスクを実行する構成はどれですか?
A. オプションC
B. オプションD
C. オプションB
D. オプションA
Answer: A
Explanation: According to the requirements (first use TACACS+, then allow login with no authentication), we have to use "aaa authentication login ... group tacacs+ none" for AAA command. The next thing to check is the if the "aaa authentication login default" or "aaa authentication login list-name" is used. The 'default' keyword means we want to apply for all login connections (such as tty, vty, console and aux). If we use this keyword, we don't need to configure anything else under tty, vty and aux lines. If we don't use this keyword then we have to specify which line(s) we want to apply the authentication feature. From above information, we can find out answer C is correct. Although the "password 70202039485748" line under "line vty 0 4" is not necessary. If you want to learn more about AAA configuration, please read our AAA TACACS+ and RADIUS Tutorial - Part 2. For your information, answer D would be correct if we add the following command under vty line ("line vty 0 4"): "login authentication

telnet" ("telnet" is the name of the AAA list above)
