NEW QUESTION: 1A. Option DB. Option AC. Option CD. Option BAnswer: D

NEW QUESTION: 2Sie müssen ein Problem mit der Benachrichtigungswartezeit beheben. Welche beiden Aktionen sollten Sie ausführen? Jede richtige Antwort ist Teil der Lösung.
HINWEIS: Jede richtige Auswahl ist einen Punkt wert**A.** Setzen Sie Always On auf false**B.** Stellen Sie sicher, dass die Azure-Funktion einen App Service-Plan verwendet.**C.** Stellen Sie sicher, dass für die Azure-Funktion ein Verbrauchsplan festgelegt ist.**D.** Setzen Sie Always On auf true.
Answer: B,DExplanation:Azure Functions can run on either a Consumption Plan or a dedicated App Service Plan. If you run in a dedicated mode, you need to turn on the Always On setting for your Function App to run properly. The Function runtime will go idle after a few minutes of inactivity, so only HTTP triggers will actually "wake up" your functions. This is similar to how WebJobs must have Always On enabled.Scenario: Notification latency: Users report that anomaly detection emails can sometimes arrive several minutes after an anomaly is detected. Anomaly detection service: You have an anomaly detection service that analyzes log information for anomalies. It is implemented as an Azure Machine Learning model. The model is deployed as a web service.If an anomaly is detected, an Azure Function that emails administrators is called by using an HTTP WebHook.References:

NEW QUESTION: 3Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant- Users sign in to computers that run Windows 10 and are joined to the domain.You plan to implement Azure AD Seamless Single Sign-On (Azure AD Seamless SSO).You need to configure the computers for Azure AD Seamless SSO.What should you do?**A.** Enable Enterprise State Roaming.**B.** Modify the Intranet Zone settings.**C.** Install the Azure AD Connect Authentication Agent.**D.** Configure Sign-in options.**Answer: D**

NEW QUESTION: 4 SIMULATION The headquarter office for a cement manufacturer is installing a temporary Catalyst 3550 in an IDF to connect 24 additional users. To prevent network corruption, it is important to have the correct configuration prior to connecting to the production network. It will be necessary to ensure that the switch does not participate in VTP but forwards VTP advertisements that are received on trunk ports. Because of errors that have been experienced on office computers, all non-trunking interfaces should transition immediately to the forwarding state of Spanning tree. Also configure the user ports (all FastEthernet ports) so that the ports are permanently non-trunking. Requirement: You will configure FastEthernet ports 0/12 through 0/24 for users who belong to VLAN 20. Also all VLAN and VTP configurations are to be completed in global configuration mode as VLAN database mode is being deprecated by Cisco. You are required to accomplish the following tasks:

1. Ensure the switch does not participate in VTP but forwards VTP advertisements received on trunk ports.
2. Ensure all non-trunking interfaces (Fa0/1 to Fa0/24) transition immediately to the forwarding state of Spanning-Tree.
3. Ensure all FastEthernet interfaces are in a permanent non-trunking mode.
4. Place FastEthernet interfaces 0/12 through 0/24 in VLAN 20.

Answer:
Explanation: Please Refer to Explanation below for details: Explanation/Reference: Console into the Switch

```
Switch>enable
Switch#configure terminal
Switch(config)#interface range fa0/1 - 24
Switch(config-if-range)#switchport mode access <<Make all FastEthernet interfaces into access mode.
Switch(config-if-range)#spanning-tree portfast <<Enables the PortFast on interface.
Next, we need to assign FastEthernet ports 0/12 through 0/24 to VLAN 20. By default, all ports on the switch are in VLAN 1. To change the VLAN associated with a port, you need to go to each interface (or a range of interfaces) and tell it which VLAN to be a part of.
Switch(config-if-range)#interface range fa0/12 - 24
Switch(config-if-range)#switchport access vlan 20 <<Make these ports members of vlan 20
Switch(config-if-range)#exit
Next we need to make this switch in transparent mode. In this mode, switch doesn't participate in the VTP domain, but it still forwards VTP advertisements through any configured trunk links.
Switch(config)#vtp mode transparent
Switch(config)#exit
Switch#copy running-config startup-config
```
