NEW QUESTION: 3This question consists of two statements: One is named Assertion and the other is named Reason. Both of these statements may be true; both may be false; or one may be true, while the other may be false.To answer this question, you must first evaluate whether each statement is true on its own. If both statements are true, then you must evaluate whether the Reason (the second statement) correctly explains the Assertion (the first statement). You will then select the answer from the list of answer choices that matches your evaluation of the two statements.Assertion:You can manage VMware ESX hosts and virtual machines by using a System Center Virtual Machine Manager(SCVMM) server.Reason:SCVMM automatically imports

ESX hosts and virtual machines when you add the corresponding VMware vCenter to the SCVMM server. Evaluate the Assertion and Reason statements and choose the correct answer option. **A.** The Assertion is true, but the Reason is false. **B.** Both the Assertion and Reason are true, and the Reason is the correct explanation for the Assertion. **C.** Both the Assertion and the Reason are false. **D.** The Assertion is false, but the Reason is true. **E.** Both the Assertion and Reason are true, but the Reason is not the correct explanation for the Assertion. **Answer: A**
Explanation: * Assertion: true Virtual Machine Manager (VMM) enables you to deploy and manage virtual machines and services across multiple hypervisor platforms, including VMware ESX and ESXi hosts. * Reason: False When you add a vCenter Server, VMM no longer imports, merges and synchronizes the VMware tree structure with VMM. Instead, after you add a vCenter Server, you can add selected ESX servers and hosts to any VMM host group. Therefore, there are fewer issues with synchronization.
