NEW QUESTION: 1What is true about the Cisco IOS Resilient Configuration feature?**A.** There is additional space required to secure the primary Cisco IOS Image file**B.** Remote storage is used for securing files**C.** The feature can be disabled through a remote session**D.** The feature automatically detects image and configuration version mismatch**Answer: D****Explanation:**
ExplanationThe following factors were considered in the design of Cisco IOS Resilient Configuration:
+ The configuration file in the primary bootset is a copy of the running configuration that was in the router when the feature was first enabled.
+ The feature secures the smallest working set of files to preserve persistent storage space. No extra space is required to secure the primary Cisco IOS image file.
+ The feature automatically detects image or configuration version mismatch .
+ Only local storage is used for securing files, eliminating scalability maintenance challenges from storing multiple images and configurations on TFTP servers.
+ The feature can be disabled only through a console session Source:
