NEW QUESTION: 1You need to resolve the authentication issue that occurs in the SharePoint environment. What should you do? Case Study Title (Case Study): Topic 2, Photo Processing Background General Background You are a SharePoint administrator for an online photo-processing company named Contoso, Ltd. Contoso's primary customers are professional photographers. The Contoso SharePoint 2013 environment includes the sites described in the following table. The intranet site includes a document library for each employee in which the employee stores photos. Technical Background The SharePoint environment contains five front-end web servers that use Windows Network Load Balancing (NLB) with NLB affinity set to None. The company maintains all processed photos in the SharePoint content database. The content database uses RAID 5 storage. Photo files that are more than one year old are rarely viewed. Employees actively use the default self-service site creation feature. The network infrastructure contains an Active Directory Domain Services (AD DS) environment. All servers run Windows Server 2008 R2. The internal AD DS domain is named contoso.com. Active Directory Federation Services (AD FS) is deployed in the LAN. Two AD FS proxy servers are deployed in the perimeter network. Users log on to client computers by using the syntax [\[email#160;protected\]](#). Contoso has a lab environment that includes a dedicated AD DS environment and SharePoint 2013. The main lab SharePoint site is located at lab.intranet.contoso.com. A test site for a project named Project2 exists under lab.intranet.contoso.com/corp. The default self-service site creation feature is enabled for the test site. Contoso has a development team that maintains the public website, maintains the intranet site, and creates SharePoint apps. The development team recently created a SharePoint-hosted app named Appl that converts .tif files to .png files. Future Development Contoso is forming a new corporation named Proseware, Inc. that will sell SharePoint apps. The -company has acquired the proseware.com domain name. Contoso is preparing to federate with Microsoft Office 365 and will use the proseware.com -domain for Office 365 services. Technical Requirements You must meet the following technical requirements: App1 must have access to each employee's photo document library. -App1 must use Windows Authentication. -Each front-end web server must use a single IP address for all SharePoint sites and apps on that server. All SharePoint sites and apps must listen on port 9000. -Office 365 must use single sign-on (SSO). -The company has established the following new monitoring requirements for the production SharePoint environment: -Monitor whether a large number of documents are checked out. -Monitor whether a large number of unpublished items are being requested. The
