NEW QUESTION: 1A. Option DB. Option AC. Option CD. Option B **Answer: C** Explanation: The Set-DnsServerForwarder cmdlet changes forwarder settings on a Domain Name System (DNS) server. This cmdlet sets or resets IP addresses to which the DNS server forwards DNS queries when it cannot solve them locally. This cmdlet overwrites existing server level forwarders. Setting IP addresses by using this cmdlet causes the DNS server to perform recursive queries to the DNS servers at the specified IP addresses. By default, the DNS server waits five seconds for a response from one forwarder IP address before it tries another forwarder IP address

NEW QUESTION: 2 You enabled CDP on two Cisco Routers which are connected to each other. The Line and Protocol status for the interfaces on both routers show as UP but the routers do not see each other as CDP neighbors. Which layer of the OSI model does the problem most likely exist? **A.** Physical **B.** Session **C.** Network **D.** Application **E.** Data-Link **Answer: E** Explanation: CDP is a protocol that runs over Layer 2 (the data link layer) on all Cisco routers, bridges, access servers, and switches. CDP allows network management applications to discover Cisco devices that are neighbors of already known devices, in particular, neighbors running lower-layer, transparent protocols. With CDP, network management applications can learn the device type and the SNMP agent address of neighboring devices. This feature enables applications to send SNMP queries to neighboring devices. In this case, the line protocol is up which means that the physical layer is operational (layer 1) but the data link layer is not. **Incorrect Answers:** A: CDP operates at layer 2. The physical layer is layer 1. B: CDP operates at layer 2. The session layer is layer 5. C: CDP operates at layer 2. The application layer is layer 7. E: CDP operates at layer 2. The network layer operates at layer 3. Reference: "Configuring CDP"

NEW QUESTION: 3 While there will always be a need for social programs geared toward alleviating the poverty of individuals, the community is perhaps the more relevant level for public policy intervention, especially in rural areas. It has been recognized that social isolation within urban ghettos is a structural characteristic of urban poverty, but rural poverty is marked by physical isolation as well. This uniqueness makes rural community poverty particularly intractable, requiring policies that account for the cost of isolation. It is possible to provide vocational training for individuals anywhere, but if there are no jobs within the community for those individuals, the training is largely wasted. The current transition to a service-based economy and deregulation in transportation (resulting in disproportionately higher transportation costs for relatively isolated areas) have only exacerbated the growing social and economic distress in rural America, underscoring the need to redefine poverty and redirect the focus of our funding agencies and policy-makers in accordance with the new definition. What's needed is a more holistic view on an aggregate level, where poverty is properly seen as a condition of the local social structure, with income only one of the salient parameters. The author mentions "the current transition to a service-based economy and deregulation in transportation" (lines 20-22) most likely to **A.** underscore the isolation of people in rural communities **B.** suggest that manufacturing jobs are disappearing **C.** contrast the old economy with the new economy **D.** provide support for a more flexible poverty standard **E.** emphasize the lack of job skills among rural residents **Answer: D** Explanation: Explanation/Reference: Explanation: transition to a service-based economy and deregulation in transportation . . . underscor[e] the need to redefine poverty." The refined definition that the author advocates is apparent from the passage's opening and final sentences: Poverty should be measured not just at the individual level but also at the community level (especially in rural areas). In other words, the standard for poverty should be more flexible, as choice E. indicates.

NEW QUESTION: 4 **A.** Option **C** **B.** Option **D** **C.** Option **A** **D.** Option **B** **Answer: D** Explanation: <https://www.microsoft.com/ja-jp/dynamics/crm-customer-center/preview-feature-action-card-s-reference.aspx>
