ARC-300 certification is the one of the top certification in IT industry, In the meantime, we will revise the ARC-300 study materials and we are sure that it is suitable to the latest test continually.

**NEW QUESTION: 1**You work as a project manager for BlueWell Inc. You are calculating the performance indexes of your project. The cost variance (CV) of your project is 30. What does this figure depict?**A.** Costs are higher than planned.**B.** Costs are right on target.**C.** Project is behind the schedule.**D.** Costs are lower than planned.**Answer: D****Explanation:**According to the question, the cost variance of the project is 30, which is a positive figure. A positive value means that cost is less than planned. What is CV? Cost variance (CV) is a measure of cost performance on a project. The variance notifies if costs are higher than budgeted or lower than budgeted.

The cost variance is calculated based on the following formula:  $CV = \text{Earned Value (EV)} - \text{Actual Cost (AC)}$  A positive value means that spending is less than budgeted, whereas a negative value indicates that costs are higher than originally planned for the project. Answer option C is incorrect. If the CV is zero, it shows that cost is right on target. Answer option A is incorrect. This result is depicted by viewing the schedule variance (SV), not the CV. Answer option B is incorrect. If the CV is a negative value, it depicts that the costs are higher than planned.

**NEW QUESTION: 2** Which of the following should be the FIRST step of incident response procedures?  
**A.** Perform a risk assessment to determine the business impact.  
**B.** Identify if there is a need for additional technical assistance.  
**C.** Evaluate the cause of the control failure.  
**D.** Classify the event depending on severity and type.  
**Answer: A**

**NEW QUESTION: 3** A company is deploying a new instant messaging app to allow for communications with external vendors. Each entity will host its own version of the application, but users must be able to talk between the companies. Which of the following security techniques would MOST likely be used to allow this to happen?  
**A.** Multifactor authentication  
**B.** User synchronization  
**C.** Public federation  
**D.** Password synchronization  
**Answer: A**
