**NEW QUESTION: 1** Refer to the exhibit. A CUCM user has been configured to use the Mobility feature and is expecting their home phone 408-555-6016 to ring simultaneously when their office phone is called. What configuration change needs to be made to allow this happen? **A.** Select the Enable Move to Mobile check box. **B.** Deselect the Enable Single Number Reach check box. **C.** Select the Line Association check box. **D.** Select the Enable Extend and Connect check box. **Answer: C**

**NEW QUESTION: 2** Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. You are developing a database to track customer orders. The database contains the following tables: Sales.Customers, Sales.Orders, and Sales.OrderLines. The following table describes the columns in Sales.Customers. The following table describes the columns in Sales.Orders. The following table describes the columns in Sales.OrderLines. You need to create a function that accepts a CustomerID as a parameter and returns the following information: - all customer information for the customer - the total number of orders for the customer - the total price of all orders for the customer - the average quantity of items per order How should you complete the function definition? To answer, drag the appropriate Transact-SQL segment to the correct locations. Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Explanation Box 1: RETURNS TABLE The function should return the following information: - all customer information for the customer - the total number of orders for the customer - the total price of all orders for the customer - the average quantity of items per order Box 2: COUNT The function should return the total number of orders for the customer. Box 3: SUM The function should return the total price of all orders for the customer. Box 3: AVG The function should return the average quantity of items per order. Box 4: GROUP BY Need to use GROUP BY for the aggregate functions. References:

**NEW QUESTION: 3** Use XSLT transformation to create XML according to the schema (portions modified for this question) defined by TravelXML. Perform XSLT transformation on the "XML Document" using the following "XSLT Style Sheet". Select which of the following correctly describes the results of performing a validation check on the post-transformation XML against the schema ("XML Schema" referenced when the Exhibit Button is pushed).  
**A.** The post-transformation XML includes all of the required elements defined by the schema (all elements defined once they have appeared, namespace reflected); however, is not valid  
**B.** The root element (document element) of the post-transformation XML is an empty element, and the post-transformation XML is not valid against the schema  
**C.** The post-transformation XML is valid  
**D.** The post-transformation XML does not include the required elements defined by the schema (all elements defined once they have appeared, namespace reflected); therefore, is not valid  
**Answer: C**

**NEW QUESTION: 4** You have just received some room and WiFi access control recommendations from a security consulting company. Click on each building to bring up available security controls. Please implement the following requirements:  
The Chief Executive Officer's (CEO) office had multiple redundant security measures installed on the door to the office. Remove unnecessary redundancies to deploy three-factor authentication, while retaining the expensive iris reader.  
The Public Cafe has wireless available to customers. You need to secure the WAP with WPA and place a passphrase on the customer receipts.  
In the Data Center you need to include authentication from the "something you know" category and take advantage of the existing smartcard reader on the door.  
In the Help Desk Office, you need to require single factor authentication through the use of physical tokens given to guests by the receptionist.  
The PII Office has redundant security measures in place. You need to eliminate the redundancy while maintaining three-factor authentication and retaining the more expensive controls.  
Instructions: The original security controls for each office can be reset at any time by selecting the Reset button. Once you have met the above requirements for each office, select the Save button. When you have completed the entire simulation, please select the Done button to submit. Once the simulation is submitted, please select the Next button to continue.
