NEW QUESTION: 1 Testlet: School of Fine Art You need to recommend changes to the existing environment that meet the company's security requirements for the file server on the main campus. What should you recommend?

Case Study Title (Case Study): COMPANY OVERVIEW

School of Fine Art is an educational institution that has a main campus and two satellite campuses. The main campus is located in New York. The satellite campuses are located in Los Angeles and Chicago. The main campus has approximately 4,000 users made up of students, faculty, and employees. Each satellite campus has approximately 1,000 users made up of students, faculty, and employees.

EXISTING ENVIRONMENT

The network contains a single Active Directory domain named fineartschool.net. All servers run Windows Server 2008 R2. All client computers run either Windows XP or Windows 7. The network contains Microsoft Application Virtualization (App-V) and Microsoft Enterprise Desktop Virtualization (MED-V).

Existing Network Infrastructure

The main campus has the following servers:

- A file server that contains confidential files.
- A print server that has several printers installed.
- A server that has the Windows Server Update Services (WSUS) server role installed. All client computers are updated by using the WSUS server.

The main campus has a computer lab. The lab has 50 client computers that run Windows 7 Enterprise. The computer accounts for the lab computers are located in an organizational unit (OU) named LabOU. The user accounts and computer accounts for all of the students are located in an OU named StudentsOU. Both OUs are child objects in the fineartschool.net domain. The relevant Group Policy objects (GPOs) are configured as shown in the following table.

REQUIREMENTS

Technical Requirements

- The computer lab must meet the following requirements:
 - Ensure that the user settings in all domain-level GPOs are applied to each student.
 - Prevent the settings in all domain-level GPOs from being applied to the client computers in the computerlab.
- The update management infrastructure must meet the following requirements:
 - Each campus must control the updates for its respective campus.
 - Update status reports must be sent weekly to the Enterprise Administrator on the main campus.
- Application Requirements**
- All client computers will be upgraded to Windows 7 Enterprise. An application named App1 runs on every client computer. App1 is only compatible with Windows XP. App1 must remain available after all of the operating system upgrades are complete. App1 must meet the following requirements:
 - App1 must be available from the Start menu.
 - The management of App1 must be centralized.
 - Each user must have a unique instance of App1.
- Security Requirements**
- Security for the file server on the main campus must meet the following requirements:
 - Unauthorized users must be prevented from printing sensitive files stored on the server.
 - The contents of the server's hard disks must remain secure if the physical security of the server is compromised.

Problem Statements

- Users report that they receive a different desktop environment every time they log on to a client computer in the computer lab.
- The print server on the main campus has reliability issues. A malfunction on a single printer
