**NEW QUESTION: 1** John Adams is an HR partner in the ACME organization. ACME IT wants to limit access to HR servers to a set of designated IP addresses to minimize malware infection and unauthorized access risks. Thus, the gateway policy permits access only from John's desktop which is assigned a static IP address 10.0.0.19. He has received a new laptop and wants to access the HR Web Server from anywhere in the organization. To make this scenario work, the IT administrator: 1) Enables Identity Awareness on a gateway, selects AD Query as one of the Identity Sources, and installs the policy. 2) Adds an access role object to the Firewall Rule Base that lets John Adams access the HR Web Server from any machine and from any location and installs policy.
