NEW QUESTION: 3 What is the Overlay Transport Virtualization site VLAN used for?
A. to detect devices at the site that are not capable of OTV **B.** to detect other OTV edge devices in the site **C.** to allow multiple site AEDs to communicate with each other **D.** to allow the join interfaces at different sites to communicate
Answer: B

NEW QUESTION: 4 Joe, a security administrator, is concerned with users tailgating into the restricted areas. Given a limited budget, which of the following would BEST assist Joe with detecting this activity?
A. Place a full-time guard at the entrance to confirm user identity. **B.** Revoke all proximity badge access to make users justify access. **C.** Install a motion detector near the entrance. **D.** Install a camera and DVR at the entrance to monitor access.
Answer: D
Explanation: Tailgating is a favorite method of gaining entry to electronically locked systems by following someone through the door they just unlocked. With a limited budget installing a camera and DVR at the entrance to monitor access to the restricted areas is the most feasible solution. The benefit of a camera (also known as closed-circuit television, or CCTV) is that it is always running and can record everything it sees, creating evidence that can be admissible in court if necessary.
