There are 12 rows in the Category table. The maximum CategoryID is 12. The Product table contains at least one product in every category. Data in the tables was accidentally modified. To correct this, you need to make some updates directly to the tables. You issue several statements. Which result or results will you obtain for each Transact-SQL statement? To answer, drag the appropriate results to the correct Transact-SQL statements. Each result may be used once, more than once, or not at all.
