NEW QUESTION: 1 Which feature comes standard with the SurePOS C85?**A.** SurePorts**B.** 64 GB SSD**C.** DVD burner**D.** 4GBDDR3**Answer: C**Explanation:*SATA DVD-R/W option (Standard on C85) *4900-C85 The controller offering provides a comprehensive back-office hardware solution designed for the high-demand retail environment. The controller is based on the performance model, equipped with a standard configuration that adapts to a server environment by including an optical drive(D)and removing the SurePorts(not C). The Intel Core i3 2120 and the Celeron Dual Core G540. 500 GB SATA HDD standard, 2 GB DDR3 base memory and integrated RAID support standard and no SurePorts. In the US the system ships with a PC 101-key keyboard.

NEW QUESTION: 2 After launching a new Amazon EC2 instance from a Microsoft Windows 2012 Amazon Machine Image (AMI), the SysOps Administrator is unable to connect to the instance using Remote Desktop Protocol (RDP).The instance is also unreachable. As part of troubleshooting, the Administrator deploys a second instance from a different AMI using the same configuration and is able to connect to the instance.What should be the next logical step in troubleshooting the first instance?**A.** Use VPC Flow Logs to gather operating system log files for analysis.**B.** Use AWS Trusted Advisor to gather operating system log files for analysis.**C.** Use EC2Rescue to gather operating system log files for analysis.**D.** Use Amazon metrics using Amazon CloudWatch Logs.**Answer: C**Explanation:ExplanationReference https://aws.amazon.com/premiumsupport/knowledge-center/troubleshoot-remote-desktop-connection-ec2-windo

NEW QUESTION: 3 The quality function deployment process is used to_____**A.** Support production planning and the just-in-time approach**B.** Provide better product definition and product development**C.** Help products to succeed in the marketplace**D.** Improve the functional characteristics of a product**Answer: B**Explanation:Quality function deployment helps a design team to define, design, manufacture, and deliver a product or service to meet or exceed customer needs. Its main features are to capture the customer's requirements, ensure cross-functional teamwork, and link the main phases of product development - product planning, part deployment, process planning, and production planning. [Planning] Evans and Lindsay 2005, 568-569 PMI@, PMBOK@ Guide, 2013, 556

NEW QUESTION: 4 ScenarioA central government department, the Ministry of Food Hygiene (MFH), faces increasing pressure to cut costs, better manage suppliers' performance and reduce the confusion caused by inadequate internal controls, outdated standards and outdated technology. External consultants were employed to conduct a feasibility study to identify options to address the problems, and the likely costs and benefits. The following options were considered:● Do nothing.● Re-engineer selected business functions.● Outsource selected business functions.The feasibility study concluded that there was a case for outsourcing the MFH Information Technology Division and the Facilities Division (maintenance

of buildings and grounds). The recommendations were:● One service provider should be contracted to provide the services currently provided by the Information Technology Division and the Facilities Division.● A 10-year service contract should be agreed with the selected service provider.The feasibility study developed high-level designs of the current organization, processes, systems and operating models, plus an outline Business Case for the required project. The external consultants also made the following recommendations for the management of the project:● Use PRINCE2.● Set up the project with 4 management stages: Stage 1. Standard PRINCE2 initiation activities.Stage 2. Create detailed designs (future organization, processes, systems and operating models) and the service level agreement between MFH and the future service provider.Stage 3. Request and evaluate proposals, select service provider and agree contract.Stage 4. Transfer equipment and staff, transfer responsibility for service provision and run trial period.Initial estimates indicated that the project would cost £2.5m and take two years to complete.MFH senior management agreed that there was a case for outsourcing, and accepted the recommendations as a basis for the project. There is an expected saving of £20m over 10 years.The Outsourcing project has completed the Starting up a Project process and is now in the initiation stage.Because of the strategic importance of the project, the MFH Chief Executive Officer has taken the role of Executive. A PRINCE2-experienced Project Manager has been appointed from within MFH. Staff within the business functions being outsourced will work with the external consultants who conducted the feasibility study to define the detailed designs.Which 2 statements should be recorded under the Timescale heading?**A.** The expected benefits should start to be realized as soon as the outsourced services become operational at the end of stage 4.**B.** The expected benefits will be calculated over 10 years from completion of the project.**C.** The contract with the selected service provider will be agreed during stage 3.**D.** The transfer of equipment and staff is estimated to take six weeks.**E.** If more MFH divisions are added to the scope of the services to be outsourced, the project timescale will be extended and the realization of benefits will be delayed.**Answer: B,C**
