Our CWAP-404 training materials will have the collective of the questions and answers, it will help you to have a good command of the knowledge point, therefore make it possible for you to pass the exam.

Taking an exam, again and again, is a disaster prepares our CWAP-404 exam questions, Just rush to buy our CWAP-404 practice guide!

NEW QUESTION: 1You have 100 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.You need to configure the following device restrictions:* Block users from browsing to suspicious websites.* Scan all scripts loaded into Microsoft Edge.Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationReference:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-smartscreen/windows-de>

NEW QUESTION: 2An admin installed new DDR3 memory in a server and discovered that the server contained quad-rank, 2 rank and 1 rank.What should you recommend?**A.** Populate the memory modules from the heaviest to the lightest load within a channel**B.** Populate similar load memory module within the same memory channel**C.** Replace all memory modules so that they are the same load**D.** Populate similar load memory module within the same memory controller**Answer: A**Explanation:See HP Product Bulletin --> Populate DIMMs from heaviest load (quad-rank) to lightest load (single-rank) within a channel. Heaviest load (DIMM with most ranks) within a channel goes furthest from the processor

NEW QUESTION: 3You are creating a SQL Server 2008 Integration Services (SSIS) package which should beintercalated on 20 servers for Company.com.You can't visit the file system of any server.You should change the package setting attributes when package is running.Which is the correct answer below?**A.** You should create an XML configuration file. Select the XML configuration type in the SSIS Package Configurations Organizer.**B.** You should Use the SSIS Package Configuration Wizard to create a SQL Server Configuration type. Select a centralized Microsoft SQL Server to store the package configuration**C.** You should create a batch file that uses the dtutil utility program to set the package configuration properties while the package deploys into production.**D.** You should create a .REG file that contains entries for each of the configuration properties. Select a single Registry Configuration type in the SSIS Package Configurations**Answer: B**Explanation:Type Description XML Configuration File Stores configuration settings in an XML file in the file system.Select XML Configuration File if you are comfortable working with configuration files and your project requirements let you store

configuration information in a file system file. You can store multiple configurations in a single XML file. Environment Variable Saves the configuration information inside the system's global variables collection, which is called an environment variable. When you add an Environment Variable configuration, you can choose only one property for each Environment Variable configuration. Registry Entry Lets you save package properties and settings inside your computer's registry. You can select multiple configuration settings at a time and store them in the registry. Parent Package Variable Provides a way to inherit the value of a variable from a parent package. When a package is executed from another SSIS package by using the Execute Package Task, the values of its variables are available to the child package through the Parent Package Variable configuration. With this configuration type, you can choose only one package property setting at a time. SQL Server Uses a SQL Server table to store the package setting information. This configuration setting lets you store multiple configurations in a single table. Creating a SQL Server Configuration If you decide to store your package configurations in a SQL Server table, select SQL Server from the Configuration Type drop-down list in the Package Configuration Wizard. Using Microsoft SQL Server as the storage mechanism for your configurations requires a different group of settings from what the other configuration types, such as the XML Configuration File, use. Figure 3-5 shows the SQL Server configuration options available for setting up configurations.

EXAM TIP 72 Packages can share SQL Server configurations even if they are running on different servers because the SQL Server configuration does not have to be stored on the local server, unlike the other configuration types
