い。www.examplesite.com
追加情報：許可メールサーバーのIPアドレスは192.168.2.10と192.168.2.11です。
ネットワークのサブネットは192.168.2.0 / 25です。
次のうちどれがセキュリティ管理者がこのリスクを排除するために取ることができるであろう最も
適切な行動方針ですか？ (2を選択) **A.**
すべての不正なメールサーバーに対してファイアウォールのポート25をブロックします。**B.**
許可されていないメールサーバー上の悪意のある活動の起点を特定します。**C.**
不正メールサーバーのSMTPサービスをシャットダウンします。**D.**
オープンリレー機能を無効にします。**E.** スпамフィルタでSTARTTLSを有効にします。**Answer:**
A,CExplanation:In this question, we have an unauthorized mail server using the IP:
192.168.2.55.Blocking port 25 on the firewall for all unauthorized mail servers is a common and

recommended security step. Port 25 should be open on the firewall to the IP addresses of the authorized email servers only (192.168.2.10 and 192.168.2.11). This will prevent unauthorized email servers sending email or receiving and relaying email. Email servers use SMTP (Simple Mail Transfer Protocol) to send email to other email servers. Shutting down the SMTP service on the unauthorized mail server is effectively disabling the mail server functionality of the unauthorized server. Incorrect Answers: A: You shouldn't worry about identifying the origination point for the malicious activity on the unauthorized mail server. There isn't much you could do about the remote origination point even if you did identify it. You have an 'unauthorized' mail server. That is what you should be dealing with. C: In this question, the email was received by the unauthorized email server (192.168.2.55) ready to be collected by the recipient. The email was not relayed (forwarded) to other email servers. Disabling open relay functionality will not stop the emails. You need to disable all email (SMTP) functionality of the unauthorized server, not just relaying. E: STARTTLS enables TLS encryption on communications with the spam filter. It will do nothing to prevent the usage of the unauthorized email server. NEW QUESTION: 3 DRAG DROP You are developing a class named Temperature. You need to ensure that collections of Temperature objects are sortable. You have the following code: Which code segments should you include in Target 1, Target 2 and Target 3 to complete the code? (To answer, drag the appropriate code segments to the correct targets in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.) **Answer:** Explanation: Explanation: Target 1: Target 2: CompareTo Target 3: Note: Target 1: The role of IComparable is to provide a method of comparing two objects of a particular type. This is necessary if you want to provide any ordering capability for your object. Incorrect: The role of IComparer is to provide additional comparison mechanisms. For example, you may want to provide ordering of your class on several fields or properties, ascending and descending order on the same field, or both. Target 2, Target 3: Example:

```
// Implement IComparable
CompareTo method - provide default sort order
int IComparable.CompareTo(object obj){
    car c=(car)obj;
    return String.Compare(this.make,c.make);
}
```

NEW QUESTION: 4 Review the IPsec phase 1 configuration in the exhibit; then answer the question below. Which statements are correct regarding this configuration? (Choose two.) **A.** The remote gateway address on 10.200.3.1. **B.** The local IPsec interface address is 10.200.3.1. **C.** The local gateway IP address is 10.200.3.1. **D.** The local gateway IP is the address assigned to port 1. **Answer: A,D**
