NEW QUESTION: 1 DRAG DROP You need to ensure that the drug dosage endpoint is always resolved and accessible. Which three actions should you perform in sequence? **Answer:**
Explanation: Topic 4, Contoso, Ltd (B) Background Contoso, Ltd designs and manufactures medical vaccines. The company has sales and manufacturing facilities in locations all over the world. The company must permanently retain all data from clinical testing of vaccines. Contoso is subject to penalties and lawsuits if any data is lost. You maintain an application that allows medical professionals to manage data about patients, vaccine results, and possible side effects of the vaccines. You host the application in Microsoft Azure and manage the application by using the Azure portal. Current Environment Application: You have two on-premises applications that connect to Azure resources. The first application is named ContosoL. Contoso uses Windows Identity Foundation (WIF) and includes a secured area of the application that is used for single sign-on with credentials from Azure Active Directory (AD). The second application is an auditing application named ClinicalSearch. It allows you to search for clinical test results. The application resides on an Azure Virtual Machine (VM) and must meet Azure Service Level Agreement (SLAs) for availability. Auditors will be given access to the application in a 24-hour interval. You have a data collection and distribution service named DataCollect. The service runs Node.js in an Azure cloud service. The service must use a minimum of 2048-bit encryption. Infrastructure: You provision the following objects: * Premium storage * Two SQL Azure databases named CONTOSO-SQL1 and CONTOSO-SQL2. CONTOSO-SQL1 will store current product data and will be scaled up to optimize performance during peak hours. CONTOSO-SQL2 will store archived product data. * Table Storage Deployment You deploy resources as a resource group by using Azure Resource Manager (ARM). You use templates to deploy resources to different environments. The cloud service is deployed using standard methods. You provide medical professionals and other clients access to the storage resources. Problem Statements Users are reporting that during peak hours, it takes a long time to save documents to the environment. Researchers report that the DataCollect service takes a long time to respond when data is being sent to the service. Monitoring You enable minimal monitoring metrics for application. You enable boot diagnostics for all VMs
