So choose our HP HPE2-B04 exam bootcamp, we will not let you down, As leading company of practice materials market in the world, we prepare for success with fortitude and perspiration in accordance with customer first principle.

### NEW QUESTION: 1

あるネットワーク技術者が、いくつかのルーターとスイッチの構成をローカルにバックアップしたいと考えています。

彼は、認証なしで回復のために簡単にアクセスできるサーバーにそれらを保管したいと考えています。次のサーバーのうちどれを使うべきですか？**A. Samba B. LDAP C. TFTP D. Telnet****Answer: C**

**NEW QUESTION: 2** Which goal of peer-gateway in vPC is true? **A.** Transmit BPDUs from the secondary and primary vPC switch. **B.** Configure the MAC address of the vPC peer as a gateway MAC. **C.** Use the same bridge ID when sending BPDUs from switches in a vPC pair. **D.** Act as a single router when peering dynamic routing protocols over a vPC. **Answer: D**

**NEW QUESTION: 3** Your company has a main office. The network contains an Active Directory domain named contoso.com. The main office contains a server named Server1 that runs Windows Server 2012. Server1 has the Remote Access server role installed and is configured to accept incoming SSTP-based VPN connections. All client computers run Windows 7. The company plans to open a temporary office that will contain a server named Server2 that runs Windows Server 2012 and has the DHCP Server server role installed. The office will also have 50 client computers and an Internet connection. You need to recommend a solution to provide the users in the temporary office with access to the resources in the main office. What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer. **A.** Install the Remote Access server role on Server2. From Routing and Remote Access on Server2, configure a demand-dial interface. From DHCP on Server2, configure the default gateway server option. **B.** Uses the Connection Manager Administration Kit (CMAK) to create a connection package that specifies Server1 as the target for SSTP-based VPN connections. Use a Group Policy object (GPO) to distribute the CMAK package to each client computer in the temporary office. **C.** Use the Connection Manager Administration Kit (CMAK) to create a

connection package that specifies Server1 as the target for SSTP-based VPN connections. Manually distribute the CMAK package to each client computer in the temporary office. **D.** Install the Remote Access server role on Server2. From Routing and Remote Access on Server2, add a SSTP-based VPN port. From DHCP on Server2, configure the default gateway server option. **Answer: C** Explanation: CMAK is used for simplifying the deployment of VPN client-connection setup. With CMAK we create the VPN profile in executable file format, and then distribute it to the clients. Note: Connection Manager is a client network connection tool that allows a user to connect to a remote network, such as an Internet service provider (ISP), or a corporate network protected by a virtual private network (VPN) server. Incorrect: Not B: SSTP is not used for site-to-site connections. Not C: The remote temporary office is not connected to the domain yet, so distribution through a GPO would not work. Not D: As Server1 is configured with SSTP remote dialing cannot be right. Reference: Connection Manager Administration Kit <https://technet.microsoft.com/en-us/library/cc752995.aspx>
