NEW QUESTION: 4Sie implementieren ein Auftragsabwicklungssystem. Eine Point-of-Sale-Anwendung veröffentlicht Bestellungen zu Themen in einer Azure Service Bus-Warteschlange. Die label-Eigenschaft für das Thema enthält die folgenden Daten: Das System hat die folgenden Anforderungen für Abonnements: Sie müssen Filter implementieren und den Durchsatz maximieren, während Sie Filter auswerten. Welche Filtertypen sollten Sie implementieren? Ziehen Sie zum Beantworten die entsprechenden Filtertypen auf die richtigen Abonnements. Jeder Filtertyp kann einmal, mehrmals oder überhaupt nicht verwendet werden. Möglicherweise müssen Sie die Trennleiste zwischen den Fenstern ziehen oder einen Bildlauf durchführen, um den Inhalt anzuzeigen. HINWEIS: Jede richtige Auswahl ist einen Punkt wert.**Answer:** Explanation:Explanation:FutureOrders: SQLFilterHighPriorityOrders: CorrelationFilterCorrelationID onlyInternationalOrders: SQLFilterCountry NOT USA requires an SQL FilterHighQuantityOrders: SQLFilterNeed to use relational operators so an SQL Filter is needed.AllOrders: No FilterSQL Filter: SQL Filters - A SqlFilter holds a SQL-like conditional

expression that is evaluated in the broker against the arriving messages' user-defined properties and system properties. All system properties must be prefixed with sys. in the conditional expression. The SQL-language subset for filter conditions tests for the existence of properties (EXISTS), as well as for null-values (IS NULL), logical NOT/AND/OR, relational operators, simple numeric arithmetic, and simple text pattern matching with LIKE. Correlation Filters - A CorrelationFilter holds a set of conditions that are matched against one or more of an arriving message's user and system properties. A common use is to match against the CorrelationId property, but the application can also choose to match against ContentType, Label, MessageId, ReplyTo, ReplyToSessionId, SessionId, To, and any user-defined properties. A match exists when an arriving message's value for a property is equal to the value specified in the correlation filter. For string expressions, the comparison is case-sensitive. When specifying multiple match properties, the filter combines them as a logical AND condition, meaning for the filter to match, all conditions must match. Boolean filters - The TrueFilter and FalseFilter either cause all arriving messages (true) or none of the arriving messages (false) to be selected for the subscription. References:
