achievements, so all content of our OGEA-101 exam questions are strictly researched Valid OGEA-101 Test Papers by proficient experts who absolutely in compliance with syllabus of this exam.

There is no doubt that a high-quality The Open Group Enterprise Architecture certificate can make you more competitive and stand out among a large number of competitors, make contribution to your future development (The Open Group OGEA-101 dumps).

Therefore, the interface of our OGEA-101 quiz torrent: TOGAF Enterprise Architecture Part 1 Exam is very simple, and what's more, the software is just like the exam simulation system, you can adapt to the exam system in advance.

So why wait, With the development of science and technology, most people need to learn new knowledge and skills to keep up with the pace, If you purchase our OGEA-101 test guide, you will have the right to ask us any question about our products, and we are going to answer your question immediately, because we hope that we can help you solve your problem about our OGEA-101 exam questions in the shortest time.

We all have the same experiences that one test always include some most important parts, not everything is necessary to remember, Our OGEA-101 test questions boost timing function and the function to stimulate the exam.

material gives you the easiest and quickest way to get Enterprise Architecture Certification **OGEA-101 Reliable Test Tips** without headache, So the fragmented time can be take good use of, You must answer each question before proceeding to the next question.

**NEW QUESTION: 1A. Option AB. Option BC. Option DD. Option CAnswer: D**

**NEW QUESTION: 2**Cloud Kicks wants to utilize Opportunities to report and track subscriptions to its "Shoe of the Month" club. Subscribers can pay in full (all at one time), weekly, monthly, or quarterly. Which solution should the Consultant recommend to meet Cloud Kicks' need?**A.** Configure the use of assets with a lookup to the Opportunity object.**B.** Configure the use of contracts with a lookup to the Opportunity object.**C.** Enable schedules on the Product object.**D.** Enable schedules on the Opportunity object.**Answer: C**

**NEW QUESTION: 3**A corporate network includes a single Active Directory Domain Services (AD DS) domain. All regular user accounts reside in an organizational unit (OU) named Employees. All administrator accounts reside in an OU named Admins.You need to ensure that any time an administrator modifies an employee's name in AD DS, the change is audited.What should you do first?**A.** Enable the Audit directory service access setting in the Default Domain Policy Group Policy Object.**B.** Modify the searchFlags property for the User class in the schema.**C.** Enable the Audit directory service access setting in the Default Domain Controllers Policy Group PolicyObject.**D.** Create a Group Policy Object with the Audit directory service access setting enabled and link it to the Employees OU.**Answer: C****Explanation:**To audit changes made to objects in AD DS we have to use Directory Service Changes auditing, which indicates the old and new values of the changed properties of the objects that were changed. DirectoryService Changes auditing is a subcategory of Audit directory service access, and is not enabled by default.To use it we have to enable it first, and we can do that specifically for Directory Service Changes by using auditpol.exe, or we can use Group Policy Management to enable Audit directory service access, which enables all subcategories, including Directory Service Changes. You do this by modifying the Default Domain Controllers Policy.Reference: <http://technet.microsoft.com/en-us/library/cc731607.aspx>In Windows 2000 Server and Windows Server 2003, there was one audit policy, Audit directory service access, that controlled

whether auditing for directory service events was enabled or disabled. In Windows Server 2008, this policy is divided into four subcategories: Directory Service Access, Directory Service Changes, Directory Service Replication, Detailed Directory Service Replication. This step includes procedures to enable change auditing with either the Windows interface or a command line: By using Group Policy Management, you can turn on the global audit policy, Audit directory service access, which enables all the subcategories for AD DS auditing. To enable the global audit policy using the Windows interface:

1. Click Start, point to Administrative Tools, and then Group Policy Management.
2. In the console tree, double-click the name of the forest, double-click Domains, double-click the name of your domain, double-click Domain Controllers, right-click Default Domain Controllers Policy, and then click Edit.
3. Under Computer Configuration, double-click Policies, double-click Windows Settings, double-click Security Settings, double-click Local Policies, and then click Audit Policy.
4. In the details pane, right-click Audit directory service access, and then click Properties.
5. Select the Define these policy settings check box.
6. Under Audit these attempts, select the Success, check box, and then click OK.

**NEW QUESTION:** 4vSphere 6.5 introduced MAC learning capabilities for VMware's virtual switches. What three benefits will it provide? (Choose three.)  
**A.** Reduced memory consumption.  
**B.** Prevent packet flooding inside the vSwitch.  
**C.** Reduced consumption of extra CPU cycles.  
**D.** Increased network throughput.  
**Answer: A,B,C**
