What's more, for the new customer, you can Latest 312-39 Test Labs also enjoy some privilege for Certified SOC Analyst (CSA) real test cram during the promotion, I believe it is a wise option to choose 312-39 test cram materials as your helpful materials while preparing for your real test.

NEW QUESTION: 1DRAG DROPIn this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

OverviewGeneral OverviewContoso, Ltd. Is a manufacturing company that has 500 employees. The company has sales, marketing, research, and accounting departments. Contoso recently acquired another company named A Datum Corporation, which has 100 users with mailboxes hosted on a third-party, non-Microsoft Exchange Server platform. Contoso recently purchased an Office 365 subscription and began using Exchange Online, SharePoint Online, and Skype for Business Online. All Office 365 identities are managed in the cloud.

Physical LocationsContoso has two offices. One office is located in New York and the other office is located in London. The offices connect to each other by using a WAN link. Each office also connects directly to the Internet.

Existing EnvironmentActive DirectoryThe network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2008 R2. Each office contains five domain controllers. Each office is configured as an Active Directory site.

Current Business ModelUsers in the accounting department have access to Windows by using Remote Desktop Services (RDS). All client applications, including Office, are made available through Remote Desktop sessions. Users in the marketing department frequently change their computer and must reinstall Office. Users in the research department deal with highly sensitive patents; therefore, they do not have access to the Internet from their computer.

Problem StatementsContoso identifies the following issues on the network: Users who started using Skype for Business Online for instant messaging report that they receive increased amounts of unsolicited commercial instant messages from a domain named fabrikam.com. A new employee named User1 reports that this name was misspelled when his account was initially created, which has resulted in an incorrect user sign-in SIP address in Skype for Business Online.

Mobile Device Mailbox PoliciesYou have the following mobile device mailbox policies in Office 365.

RequirementsBusiness goalsContoso plans to upgrade to Office 2016 during the next six months. As much as possible, Contoso plans to minimize the costs associated with

purchasing hardware and software. Planned Changes Contoso plans to implement the following changes on the network: The A Datum mailboxes will be migrated to the Exchange Online tenant of Contoso by using the IMAP migration method. The executive management at Contoso wants to prevent users from accessing their Exchange Online mailbox by using Outlook on the web. As a part of the A Datum acquisition, some managers in the New York office will receive a new primary SMTP address. The current primary SMTP addresses of the managers must be demoted to secondary addresses. The manager of a user named User2 in the accounting department requests a new email address of [email#160;protected] for the user. All new email messages sent by User2 must come from the new address. User2 must still be able to receive messages by using the current address of [email#160;protected].

Technical Requirements Contoso identifies the following technical requirements: The amount of time required to install Office on the marketing department computers must be minimized. The computers of the users in the sales department must have only the 64-bit version of Office 365 ProPlus installed. All Exchange Online mailbox data must be retained for 18 months (540 days) and then moved to a user's archive mailbox. The legal department requests that only items in the mailbox of a user named User5 that were sent or received between July and November of last year be preserved for 540 days. The legal department requests that all mailbox items in the organization that have the keyword ProjectX be placed on hold for 180 days from the time they were received or created. If an In-Place Hold is configured for a user, the For compliance, turn off non-archived features Skype for Business Online option must be enabled. Users must only be notified that these features will be disabled temporarily while the In-Place Hold is in effect. Contoso plans to introduce a new mobile device mailbox policy by running the New-MobileDeviceMailboxPolicy-Name "Unrestricted"-PasswordEnabled \$true- AlphanumericPasswordRequired \$true- PasswordRecoveryEnabled \$true-IsDefault \$true- AttachmentsEnabled \$true- AllowStorageCard \$true command.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You plan to implement the new mobile device mailbox policy based on the technical requirement. Which mobile device mailbox policy will apply to VPUser1, VPUser2, and VPUser3? To answer, drag the appropriate mobile device mailbox policies to the correct users. Each mobile device mailbox policy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place: **Answer:** Explanation: Explanation/Reference: Explanation: Confusingly, the policy that Exchange Server 2010 and 2013 create automatically during setup is called "Default". However the name "Default" is not the true indication of which policy is the default. Instead it is the IsDefaultPolicy (for Exchange 2010) or IsDefault (for Exchange 2013) property that actually determines which one is the default policy. For VPUser1's mailbox we see that the ActiveSyncMailboxPolicyIsDefaulted property is set to True. This means that if we change the default mobile device mailbox policy to a different policy, that change will also take effect for VPUser1. VPUser2 is configured with a mobile device policy named Restricted. This means that if we change the default mobile device mailbox policy to a different policy, that change will not take effect for VPUser2, and he will remain on the same policy. VPUser3 is assigned to the "Default" policy again (see And also from scenario below), but the ActiveSyncMailboxPolicyIsEnabled property is still set to False. This means that VPUser3 will remain configured with the policy named "Default" even if the default is changed to a different policy.

From the scenario: Name: VPUser1 ActiveSyncMailboxPolicy: Default ActiveSyncMailboxPolicyIsDefaulted: True Name: VPUser2 ActiveSyncMailboxPolicy: Restricted ActiveSyncMailboxPolicyIsDefaulted: False Name: VPUser3 ActiveSyncMailboxPolicy: Default ActiveSyncMailboxPolicyIsDefaulted: False And also from scenario: Contoso plans to introduce a new mobile device mailbox policy by running the New- MobileDeviceMailboxPolicy-Name "Unrestricted"-PasswordEnabled \$true- AlphanumericPasswordRequired \$true- PasswordRecoveryEnabled \$true-IsDefault \$true- AttachmentsEnabled \$true- AllowStorageCard \$true command.
