It will be a magical experience, As preparation for Storage Administrator Certification [Dell PowerStore Maintenance Achievement](#) requires particle training to grasp the various aspects of the certification, Photoexperienceacademy Storage Administrator Certification also provides you lab facility.

You won't get any problem with our excellent exam training pdf and our outstanding after service, There is always a fear of losing D-PST-MN-A-24 exam and this causes you loss of money and waste time.

We really take their requirements into account.

NEW QUESTION: 1 Which of the following is the data link layer functionality? **A.** test error **B.** Routing **C.** define the physical address **D.** Physical media access **E.** Network topology **Answer: A,C,D,E**

NEW QUESTION: 2 You have a workgroup that contains five computers. The computers run Windows 7. A computer named Computer1 has video and audio files. You need to share Computer1's video and audio files on the network. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) **A.** Enable all BranchCache rules in Windows Firewall. **B.** Create a HomeGroup. **C.** Connect a removable drive and enable BitLocker To Go. **D.** Move the files to a Media Library. **Answer: B,D** Explanation: HomeGroup Connections This option decides how authentication works for connections to HomeGroup resources. If all computers in the HomeGroup have the same user name and passwords configured, you can set this option to allow Windows to manage HomeGroup connections. If different user accounts and passwords are present, you should configure the option to use user accounts and passwords to connect to other computers. This option is available only in the Home/Work network profile. Media Library Sharing Before you turn on Media Library Sharing for a shared folder, you should know that Media Library Sharing bypasses any type of user-account access that you set for the shared folder. For example, let's say that you turn on Media Library Sharing for the Photos shared folder, and you set the Photos shared folder to No Access for a user account named Bobby. Bobby can still stream any digital media from the Photos shared folder to any supported digital media player or DMR. If you have digital media that you do not want to stream in this manner, store the files in a folder that does not have Media Library Sharing turned on. If you turn on Media Library Sharing for a shared folder, any supported digital media player or DMR that can access your home network can also access your digital media in that shared folder. For example, if you have a wireless network and you have not secured it, anybody within range of your wireless network can potentially access your digital media in that folder. Before you turn on Media Library Sharing, make sure that you secure your wireless network. For more information, see the documentation for your wireless access point.

NEW QUESTION: 3 DRAG DROP Your network contains multiple servers that run Windows Server 2012. You plan to implement three virtual disks. The virtual disks will be configured as shown in the following table. You need to identify the minimum number of physical disks required for each virtual disk. How many disks should you identify? To answer, drag the appropriate number of disks to the correct virtual disk in the answer area. Each number of disks may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content. **Select and Place:** **Answer:** Explanation: Explanation/Reference: Explanation: They are not talking about Clusters, a single server only, so a standalone server.
