Answer: D
Explanation: Explanation/Reference: Explanation: Determining the root cause of the problem means to determine the origin of the problem. What may appear to be the problem on the surface is often revealed, after further analysis, not to be the real cause of the problem. Process analysis includes root cause analysis used to identify a problem, discover the underlying causes that lead to it and develop preventive actions.

NEW QUESTION: 3 Trisdale is a portfolio manager who has consistently outperformed the market on a risk-adjusted basis for the past 3 years. As an appreciation for his work, one of his clients recently gave him a travel package to Vancouver worth around \$5,000. Trisdale informed his supervisor about this gift and then took time off from work to enjoy a vacation in Vancouver. Trisdale has
A. violated Standard IV (B.3) - Fair Dealing.
B. violated Standard IV (A.3) - Independence and Objectivity.
C. not violated the AIMR code of ethics.
D. violated Standard III (D) - Disclosure of Additional Compensation Arrangements.
Answer: C
Explanation: Explanation/Reference: Explanation: The AIMR code of ethics does not preclude members from accepting gifts in excess of the modest amount of \$100 from clients, as long as they are disclosed to the immediate supervisor. What the code does prohibit is acceptance of gifts in excess of \$100 from parties that have a strong motive to influence the judgment of the members (e.g., companies that a member might be researching for investment recommendations). The disclosure of additional compensation arrangements with clients allows the supervisory authorities to monitor the portfolio activity and ensure that the gift-giving client's portfolio is not receiving any undue favorable treatment.
