If you specify the desired capacity, either when you create the group or at any time thereafter. Auto Scaling ensures that yourgroup has this many instances. If you specify scaling policies, then Auto Scaling can launch or terminate instances as demand on your application increases or decreases.Option A and B are invalid because Autoscaling is required to solve the issue to ensure the application can handle high traffic loads.Option D is invalid because there is no Autoscaling template.For more information on Autoscaling, please refer to the below document link: from AWS<http://docs.aws.amazon.com/autoscaling/latest/userguide/WhatIsAutoScaling.html>
