Besides, the HP2-I70 valid free demo is accessible for everyone, and you can download and attempt to do the demo, Thus you can interactively prepare for real HP HP2-I70 exam with actual CCT exam question.

**NEW QUESTION: 1**Contoso, Ltd., has an Office 365 tenant. You configure Office 365 to use the domain contoso.com, and you verify the domain. You deploy and configure Active Directory Federation Services (AD FS) and Azure Active Directory Connect with password synchronization. You connect to Azure Active Directory by using a Remote PowerShell session. You need to switch from using password-synced passwords to using AD FS on the Office 365 verified domain. Which Windows PowerShell command should you run?**A.**

Convert-MsolDomainToFederated -DomainName contoso.com**B.**

Set-MsolDomainAuthentication -DomainName contoso.com**C.** Convert-MsolFederatedUser**D.**

Convert-MsolDomainToStandard -DomainName contoso.com**Answer: A**Explanation: The Convert-MSOLDomainToFederated cmdlet converts the specified domain from standard authentication to single sign-on (also known as identity federation), including configuring the relying party trust settings between the Active Directory Federation Services (AD FS) server and the Microsoft Online Services. As part of converting a domain from standard authentication to single sign-on, each user must also be converted. This conversion happens automatically the next time a user signs in; no action is required by the administrator. References:

<https://docs.microsoft.com/en-us/powershell/module/msonline/convert-msoldomaintofederated?view=azureadps-1.0>

**NEW QUESTION: 2****A.** Option **A****B.** Option **E****C.** Option **D****D.** Option **F****E.** Option **B****F.** Option **G****G.** Option **C****Answer: B, F**Explanation: E: Use the following procedure (not displayed below) to

create an answer file to instruct Sysprep to copy user profile settings when you generalize the Windows image.\* (G) On the reference computer, open an elevated command prompt, and then type this command: C:WindowsSystem32SysprepSysprep /generalize /oobe /shutdown /unattend: F:CopyProfile.xml where F is the letter of the USB flash drive or other removable media. The Sysprep tool removes computer-specific information from the image, while preserving the user profile settings that you configured. Note: You can use the CopyProfile setting to customize a user profile and then copy that profile to the default user profile. Windows@ uses the default user profile as a template to assign a profile to each new user. By customizing the default user profile, you can configure settings for all user accounts that are created on the computer. By using CopyProfile, you can customize installed applications, drivers, desktop backgrounds, internet explorer settings, and other configurations. Note that some settings are not preserved by using CopyProfile. Reference: Customize the Default User Profile by Using CopyProfile

**NEW QUESTION: 3** AWSでバケットとVPCが定義されています。

VPCエンドポイントのみがバケットにアクセスできるようにする必要があります。どうすればこれを達成できますか？選んでください：A.

バケットのバケットポリシーを変更して、VPCエンドポイントへのアクセスを許可しますB.

VPCエンドポイントへのアクセスを許可するようにルートテーブルを変更しますC.

VPCのセキュリティグループを変更して53バケットへのアクセスを許可しますD.

バケットのIAMポリシーを変更して、VPCエンドポイントへのアクセスを許可します**Answer: A**

**Explanation:** This is mentioned in the AWS Documentation Restricting Access to a Specific VPC Endpoint. The following is an example of an S3 bucket policy that restricts access to a specific bucket, examplebucket only from the VPC endpoint with the ID vpce-la2b3c4d. The policy denies all access to the bucket if the specified endpoint is not being used. The aws:sourceVpce condition is used to specify the endpoint. The aws:sourceVpce condition does not require an ARN for the VPC endpoint resource, only the VPC endpoint ID. For more information about using conditions in a policy, see Specifying Conditions in a Policy. Options A and B are incorrect because using Security Groups nor route tables will help to allow access specifically for that bucket via the VPC endpoint. Here you specifically need to ensure the bucket policy is changed. Option C is incorrect because it is the bucket policy that needs to be changed and not the IAM policy. For more information on example bucket policies for VPC endpoints, please refer to below URL:

<https://docs.aws.amazon.com/AmazonS3/latest/dev/example-bucket-policies-vpc-endpoint.html> The correct answer is: Modify the bucket Policy for the bucket to allow access for the VPC endpoint. Submit your Feedback/Queries to our Experts

**NEW QUESTION: 4** A. Option AB. Option DC. Option BD. Option C**Answer: B**

**Explanation:** Reference: <http://www.vmware.com/files/pdf/vmw-vspher-5-1-stor-drs-uslet-101-web.pdf> (page 5, first para)
