NEW QUESTION: 1What is the purpose of Proof and Hold?
A. to allow additional copies to be made at the printer after entering a PIN number
B. to allow the user to verify output prior to printing additional copies
C. to allow the image to be viewed on the PC prior to printing
D. to allow the job to be permanently stored in the printer for future printing
Answer: D

NEW QUESTION: 2
A. Option E
B. Option A
C. Option D
D. Option B
Answer: B
Explanation: The first option is to put a sensor inline with the traffic, which just means that any traffic going through your network is forced to go in one physical or logical port on the sensor. Because the sensor is inline with the network, and because it can drop a packet and deny that packet from ever reaching its final destination (because it might cause harm to that destination), the sensor has in fact just prevented that attack from being carried out. That is the concept behind intrusion prevention systems (IPS). Whenever you hear IPS mentioned, you immediately know that the sensor is inline with the traffic, which makes it possible to prevent the attack from making it further into the network.
