Our IT elite finally designs the best C-ACT-2403 exam study materials by collecting the complex questions and analyzing the focal points of the exam over years, Improve your professional ability with our C-ACT-2403 certification.

We have real SAP Certified Associate exam questions with verified answers available and you are going to get same questions in your SAP Certified Associate - Project Manager - SAP Activate exam, While, the C-ACT-2403 real test may be difficult than what you thought.

We will give our support anytime if you got any problem when you purchase the C-ACT-2403 real dumps, Based on our past record people who pay attention on our C-ACT-2403 premium VCE file all passed SAP exams.

**NEW QUESTION: 1**An administrator encountered problems with inbound decryption. Which option should the administrator investigate as part of triage?  
**A.** Root certificate imported into the firewall with "Trust" enabled  
**B.** Importation of a certificate from an HSM  
**C.** Security policy rule allowing SSL to the target server  
**D.** Firewall connectivity to a CRL  
**Answer: C**  
**Explanation:**

**NEW QUESTION: 2**For which two conditions is Cisco Express Forwarding recursion disabled by default when the BGP Prefix Independent Convergence functionality is enabled? (Choose two.)  
**A.** next hops learned with a /24 mask  
**B.** next hops learned with any mask shorter than /32  
**C.** next hops that are directly connected  
**D.** next hops learned with a /32 mask  
**Answer: C,D**  
**Explanation:**Recursion is the ability to find the next longest matching path when the primary path goes down. When the BGP PIC feature is not installed, and if the next hop to a prefix fails, Cisco Express Forwarding finds the next path to reach the prefix by recursing through the FIB to find the next longest matching path to the prefix. This is useful if the next hop is multiple hops away and there is more than one way of reaching the next hop. However, with the BGP PIC feature, you may want to disable Cisco Express Forwarding recursion for the following reasons:-  
- Recursion slows down convergence when Cisco Express Forwarding searches all the FIB entries.  
- BGP PIC Edge already precomputes an alternate path, thus eliminating the need for Cisco Express Forwarding recursion. When the BGP PIC functionality is enabled, Cisco Express Forwarding recursion is disabled by default for two conditions:-  
- For next hops learned with a /32 network mask (host routes)  
- For next hops that are directly connected  
For all other cases, Cisco Express Forwarding recursion is enabled.
