Do you want to pass your exam with the least time, What you will never worry about is that the quality of PDII exam dumps, because once you haven't passed exam, we will have a 100% money back guarantee.

Our professional expert's compile practice materials painstakingly and pay close attention on the accuracy as well as the newest changes of PDII practice exam questions.

First of all, our innovative R&D team and industry experts guarantee the high quality of Salesforce Certified Platform Developer II (PDII) real questions, They are valid I finally passed my PDII after such a hard struggle.

NEW QUESTION: 1

ある企業が、電子情報開示要求を効果的に順守しなかったことで罰則に直面しています。

次のうちどれがこの問題から会社への全体的なリスクを減らすことができますか？ **A.**

既存の第三者預託PKIからの公開鍵を使用するツールによる暗号化のみを許可します。 **B.**

ファイルシステムの暗号化のみを許可し、個々のファイルの暗号化を許可しないポリシーを設定します。 **C.**

ドメインパスワードを使用して個々のファイルのみを暗号化し、古いユーザーパスワードをすべてアーカイブすることをユーザーに許可します。 **D.**

各ユーザーに、ファイルの暗号化に使用されたパスワードを分散リポジトリに記録するように要求します。 **Answer: A** Explanation: Electronic discovery (also called e-discovery) refers to any process in which electronic data is sought, located, secured, and searched with the intent of using it as evidence in a civil or criminal legal case. E-discovery can be carried out offline on a particular computer or it can be done in a network. An e-discovery policy would define how data is archived and encrypted. If the data is archived in an insecure manor, a user could be able to delete data that the user does not want to be searched. Therefore, we need to find a way of securing the data in a way that only authorized people can access the data. A public key infrastructure (PKI) supports the distribution and identification of public encryption keys for the encryption of data. The data can only be decrypted by the private key. In this question, we have an escrowed corporate PKI. Escrow is an independent and licensed third party that holds something (money, sensitive data etc.) and releases it only when predefined conditions have been met. In this case, Escrow is holding the private key of the PKI. By encrypting the e-discovery data by using the PKI public key, we can ensure that the data can only be decrypted by the private key held in Escrow and this will only happen when the predefined conditions are met. Incorrect Answers: A: File encryption should be enabled to enable the archiving of the data. B: Requiring each user to log passwords used for file encryption is not a good solution. Apart from there being no mechanism to enforce this, you should not need to know users' passwords. You need a mechanism that ensures that the data can be decrypted by authorized personnel without the need to know user passwords. C: You cannot and should not be able to archive old passwords. You need a mechanism that ensures that the data can be decrypted by authorized personnel without the need to know user passwords. References:
